Bringing the whiteboard back into the picture  
Keep a virtual eye on your meeting rooms  
Manage your video devices and settings easily  
Plug-and-Play by bringing your own laptop  
Integrate with your meeting room solutions

## Product Features

### **Take that meeting where you are**

When you have the right equipment, anywhere is a meeting room. PanaCast lets you keep up with your meetings while working from wherever.

### **Huddle up, without huddling in**

While huddling together is off the table, you can still make use of your small meeting rooms safely, with PanaCast.

### **Remote connection**

From routine check-ups to phone consultations, PanaCast makes it easy to connect with your patients and staff remotely, and safely.

### **Works with everything, everywhere**

Jabra PanaCast works with advanced video and audio conferencing solutions, and is certified for use with Microsoft Teams and Zoom. Be confident that your team can connect, whatever equipment they're using.

### **Panoramic-4K video technology**

Traditional video conferencing cameras rarely provide the full picture. Jabra PanaCast covers the full 180° field of view.

### **Bringing the whiteboard back into the picture**

A simple whiteboard is a powerful collaboration tool. But with more and more meetings going remote, using one can have its limitations - especially for those who aren't in the room to see it. It's time to reinvent the traditional whiteboard for modern ways of working.

### **Keep a virtual eye on your meeting rooms**

Managing multiple meeting rooms is much easier when you can see how they're being used. Room Insights feature, which you'll find within Jabra Xpress software, allows you to utilize the unique data capture abilities of the Jabra PanaCast to manage your meeting rooms remotely.

### **Manage your video devices and settings easily**

Manage Jabra PanaCast in Jabra Direct and Xpress alongside your headsets to keep your unit updated, control key features and keep a central overview of all your devices.

### **Intelligent Zoom**

Intelligent Zoom automatically includes everyone in the conversation, zooming in whenever meeting participants are present, optimizing screen real-estate.

### **Plug-and-Play by bringing your own laptop**

Jabra PanaCast is Plug-and-Play but you can also combine with a hub or dock that also connects speaker, TV, power and Internet, for a simple one-cable user interface.

### **Integrate with your meeting room solutions**

If you're deploying Zoom Rooms, Microsoft Teams Rooms or similar integrated solutions, Jabra PanaCast simply plugs into your existing hub, dock or compute unit.

Main Specifications

Product Description	Jabra PanaCast 50 - video conferencing device
Device Type	Video conferencing device
