Acer's Chromebook Spin 513 is a premium convertible Chromebook that offers a range of business-friendly features.

The Chromebook Spin 513 is equipped a 360° hinge, allowing you to easily switch between 4 usage modes depending on your needs - you can use it in laptop mode on a table or desk, share your screen with a colleague in display mode, get some work done in the confines of a train or plane using tent mode, or use it as a tablet when on your feet.

With a premium metal body, the Chromebook Spin 513 has a reassuring, solid feel in the hand - yet measures a mere 15.55mm thick and weighs less than 1.2kg, making it perfect for carrying around with you if you need to work on-the-go.

The Chromebook Spin 513's chassis has another trick up its sleeve too. Fully certified to meet US Military standard MIL-STD 810H, it's been tested to survive drops, knocks, spills and other mishaps; so you have peace of mind when taking it out of the office.

The Chromebook Spin 513 comes with a full-function USB-C port that allows you to connect to peripheral devices, stream video and even charge the Chromebook all simply by connecting a single cable. Plus you get integrated Wi-Fi 6 for high-speed wireless connectivity with reduced lag and drop-outs as well as additional USB ports for extra peripheral devices.

With a battery that lasts up to 13.5 hours from a single charge, the Chromebook Spin 513 can keep up with even the busiest day's work without you having to worry about finding somewhere to plug in.

Google's Chrome OS is lightweight & intuitive, which means it can easily run on a wide range of devices and new users can get to grips with it very quickly. It also incorporates a range of features that make it ideal for businesses, including automated backups, where everything is synced to the cloud automatically, so all your important data is kept safe; background updates, where the OS and apps automatically update when a new version is released, without the need for the Chromebook to reboot; and integrated virus protection, with every one of the nearly 3 million apps available on there being fully screened for malware before you can download it.

Key Selling Points

- Multiple features

Product Features

Powerful mobility

Weighing just 1.2kg, this convertible Chromebook not only is extremely light but also barely larger than a sheet of paper - slipping easily into any compact bag or backpack. Combined with the Qualcomm Snapdragon 7c, this Chromebook gives you more than enough processing power to get you through the day no matter where you take it.

More than meets the eye

The narrow-bezel design allows for a screen-to-body ratio of 78%, letting you immerse yourself in the stunning 13" Full HD IPS display.

All-day battery

With just a single charge, get in a full day's work with time to spare while leaving the power adapter behind.

Clarity of sound

This Chromebook comes with two built-in microphones that enable better microphone reception, providing better clarity of sound when videoconferencing or talking to friends online.

Full of features

Specifically designed for the needs of users on the go, this Chromebook comes with a bevy of functional features including Wi-Fi 5, Corning Gorilla glass touchscreen and touchpad, a backlit keyboard, as well as a USB Type-C port and a USB 3.2 Type-A port for extra versatility to deal with everyday challenges.
