

Cisco - power supply - hot-plug / redundant(ASR-920-PWR-A= )

Cisco - Power supply - hot-plug / redundant (plug-in module) - AC 85-264 V - for ASR 920

The Cisco power supply is engineered to meet the rigorous demands of today's network infrastructure, offering hot-plug and redundant capabilities to ensure your systems remain operational without interruption. This plug-in module is designed to be compatible with PC network hardware, making it a versatile addition to any setup. With a remarkable MTBF of 356,809 hours, it promises reliability and performance. Furthermore, it supports a broad input voltage range of AC 85 - 264 V and operates efficiently across different power conditions with a frequency requirement of 47 - 63 Hz. Whether upgrading existing equipment or setting up a new network, this power supply is built to deliver consistent, efficient power.

Key Selling Points

- Hot-plug and redundant capabilities for enhanced reliability
- Supports a wide input voltage range of AC 85 - 264 V
- Compatible with network hardware, ensuring seamless integration
- High MTBF of 356,809 hours for long-lasting performance

Product Features

- Reliable performance**  
Designed for continuous operation, the power supply boasts an impressive MTBF (Mean Time Between Failures) of 356,809 hours, ensuring dependable performance and minimizing downtime for your network hardware.
- Flexible compatibility**  
With its plug-in module form factor and compatibility with network hardware, this power supply offers a seamless integration experience, ensuring your PC and network infrastructure can maintain optimal power efficiency.
- Versatile power range**  
Accommodating a wide range of input voltages from AC 85 - 264 V and frequencies from 47 - 63 Hz, this power supply ensures your network hardware operates efficiently across various power environments.

Main Specifications

Product Description	Cisco - power supply - hot-plug / redundant
Device Type	Power supply - hot-plug / redundant - plug-in module
Input Voltage	AC 85-264 V
Designed For	ASR 920

Extended Specification

General

Device Type	Power supply - hot-plug / redundant - plug-in module
-------------	--

Miscellaneous

MTBF	356,809 hours
------	---------------

Power Device

Input Voltage	AC 85-264 V
Frequency Required	47 - 63 Hz

Compatibility Information

Designed For	Cisco ASR 920
