

Cisco Meraki - power adapter - 1025 Watt(MA-PWR-1025WAC)

Cisco Meraki - Power adapter - 1025 Watt - for Cloud Managed MS320-48FP, MS350-48FP

The Cisco Meraki 1,025W power adapter is a high-performance solution designed to meet the demanding power needs of PCs. With a generous provision of 1,025 W, this external power adapter is capable of supporting devices requiring substantial power, making it an ideal choice for computing environments. Its compatibility with PCs ensures it can be seamlessly integrated into most setups, providing a reliable and steady power source. The external form factor of the adapter allows for easy installation and flexibility in placement, ensuring your workspace remains organized and efficient. Whether you're looking to power a single high-demand device or multiple components, the Cisco Meraki power adapter offers the reliability and performance needed to keep your systems running smoothly.

Key Selling Points

- 1,025 W of power to meet high energy demands
- External form factor for easy integration with PC setups
- Designed for compatibility with a wide range of PCs
- Ensures reliable power supply with minimal disruptions

Product Features

- Efficient power supply**
Designed for seamless compatibility with PCs, this external power adapter ensures your devices stay powered with a robust 1,025 W of electricity. Its external form factor makes it easy to integrate into your existing setup without the need for internal modifications.
- Reliable performance**
Cisco Meraki's commitment to quality means this power adapter is built to support your PC's power needs reliably, ensuring you have the power you need when you need it. Its design is focused on providing a steady stream of electricity, minimizing disruptions due to power fluctuations.
