

## HPE Aruba LTE Sensor - subscription licence (3 years) - 5 MB cellular data(Q9X70AAE)

### HPE Aruba LTE Sensor - Subscription licence (3 years) - 5 MB cellular data - ESD

As workplaces become more digital, and the adoption of mobile and cloud applications grow, the network and IT staff supporting them need to meet the rising demands for secure, high-speed network access.

Building and maintaining wireless and wired networks that both users and businesses can thrive on should be as simple as using email. Relevant data should be at your fingertips. Basic configuration changes should be easy and access needs to be available from anywhere at any time.

Organizations seeking new and efficient ways to optimize their network investments - while also improving operations - need innovative solutions that adapt to their evolving needs. Aruba's cloud-managed networks are the answer to these user, IT and business demands.

## Key Selling Points

- Experience high performance networking
- Management and monitoring - the heart of a cloudmanaged network
- Powerful business and network insights
- Deliver custom guest access

## Product Features

### Not all cloud-management is created equal

Very often, cloud solutions are light-weight products stripped down to a bare minimum to satisfy a checklist. While simplicity is one of the important components of a cloud management service, there's a lot more you should demand from a business-grade solution. Aruba's cloud-management solution delivers a perfect combination of task oriented interface tools, granular configuration capabilities, and enterprise-class network management visibility - along with the cost and operational benefits of a cloud service. It's designed to deliver the operational simplicity and flexibility today's IT organizations need, with the speed and reliability users demand. Built-in analytics provide invaluable network and business insights that sets us apart.

### Make a smart cloud investment

Designed from the ground up for the cloud, Aruba Central's web-scalable database makes working with huge amounts of data easy. Built-in redundancy with clustering and distribution across multiple data centers by multiple providers ensures you're always up and running.

## Main Specifications

Product Description	HPE Aruba LTE Sensor - subscription licence (3 years) - 5 MB cellular data
Product Type	Subscription licence - 3 years
Category	Online & appliance based services - access control, appliance software
Licence Qty	5 MB cellular data
Licensing Details	ESD

## Extended Specification

### General

Category	Online & appliance based services - access control, appliance software
Product Type	Subscription licence - 3 years

### Licensing

Licence Qty	5 MB cellular data
Details	ESD
