

**Knox E-FOTA - subscription licence (3 years) - 1 licence(MI-KXKEOWWC231\_B5)**

**Knox E-FOTA - Subscription licence (3 years) - hosted - volume - 5000-9999 licences**

Samsung Knox E-FOTA provides enterprises with control over the Android OS versions deployed across their fleet of devices. This application ensures that the selected OS version is consistent across all corporate devices, allowing businesses to avoid automatic upgrades that may disrupt operations. With Knox E-FOTA, IT administrators can enforce mandatory updates while monitoring compliance through a cloud-based dashboard, making device management seamless and efficient.

Flexibility is a key feature of Knox E-FOTA, allowing updates to be scheduled according to the unique needs of each business. Companies can implement specific update triggers based on factors like battery level or connectivity status, minimizing disruptions during crucial work hours. This approach to OS management enhances productivity while securing and optimizing the usage of Samsung devices within the organization.

**Key Selling Points**

- Control OS versions across corporate devices
- Schedule updates to avoid interruptions
- Enforce system updates without user intervention
- Monitor compliance with a cloud-based dashboard
- Ensure stability for in-house applications

**Product Features**

- Efficient update management**  
Knox E-FOTA allows IT administrators to manage OS updates for Samsung devices within a fleet. This centralized control ensures that every device operates on a version suited to specific business needs, maintaining compatibility with proprietary applications.
- Flexible scheduling options**  
The application provides businesses with the ability to schedule updates at optimal times, minimizing the impact on employee productivity. Updates can be timed for off-hours or coordinated based on device battery and connectivity status.
- Compliance and oversight**  
With Knox E-FOTA, mandatory firmware updates can be enforced without user interaction, ensuring all devices remain compliant with the latest security policies. Monitoring update statuses via a cloud-based dashboard strengthens operational oversight.
