

Red Hat Smart Management Add-on (Q0D28AAE)

Red Hat Smart Management Add-on - Subscription (5 years) - 2 sockets, unlimited virtual guests - ESD - Linux

With the Smart Management Add-On you can manage the complete lifecycle of mainframes, desktops, servers, and physical or virtual machines. The Smart Management Add-On includes Red Hat Network Management and lets you provision, patch, configure, and fully control your Red Hat Enterprise Linux development, test, and production systems. You can also purchase an optional Red Hat Network Monitoring module. By proactively automating routine tasks, such as patch management, you can concentrate on other, higher-value-added tasks.

Key Selling Points

- Lifecycle management
- Provisioning
- Patch management
- Monitoring

Product Features

- Lifecycle management**
Deliver quality systems when promised and within cost estimates using an identifiable, measurable, and repeatable process.
- Provisioning**
Provision Red Hat Enterprise Linux systems quickly and consistently.
- Patch management**
Take an existing environment and replicate it, achieving a high degree of consistency throughout your IT environment.
- Monitoring**
View reports and graphs of probe performance over time to determine what adjustments need to be made.
