

NETGEAR ReadyRECOVER (RRSERV01-10000S)

NETGEAR ReadyRECOVER - Licence - 1 physical server - Win

ReadyRECOVER is a complete backup and recovery appliance designed for small and medium-sized business. Next-generation file system technology guarantees data integrity, efficient use of storage capacity and minimal impact to computing resources. With ReadyRECOVER, incremental snapshots, taken as often as needed, are ready to quickly and reliably recover Windows systems, into production mode on any platform - physical or virtual. Each backup is also ready for fast, simple recovery of files or folders. The challenges of traditional full backup techniques are solved with ReadyRECOVER delivering the speed and space savings of light-weight, incremental snapshots coupled with the benefits delivered by full backups including a simplified backup chain and retention process. ReadyRECOVER is a seamless integration of the ReadyDATA unified storage platform from NETGEAR and ShadowProtect backup and disaster recovery software from StorageCraft.

Key Selling Points

Every backup writes only changed data
Every backup is verified in real time
Every backup is a full restore point

Main Specifications
