

Logitech G920 Driving Force (941-000124)

Logitech G920 Driving Force - Wheel and pedals set - wired - for Microsoft Xbox One

Feel your tires on every turn and type of terrain, sense under- or over-steer drifting. Powerful dual-motor force feedback realistically simulates force effects for precision response. Driving Force handles the stress of racing action with solid steel ball bearings in the wheel shaft and stainless steel paddle shifters and pedals make G920 the long-distance race wheel. It's covered in high-quality, hand-stitched leather, with the look and feel of a high-performance racecar wheel and it gives you a more comfortable, durable experience. Helical gears are modeled after gears used in automotive transmissions to reduce unwanted noise and vibration. Anti-backlash keeps the wheel and pedals tight, maximizing your control. This steering wheel delivers exceptionally smooth, quiet steering action. G920 Driving Force racing wheel features a long lasting, reliable hall-effect steering sensor, using magnetic fields to sense the position of the wheel.

Key Selling Points

- Works with Xbox One and PC - enhance your console experience
- Dual-motor force feedback - experience every weight shift, and tire slip
- Designed for distance - race-ready materials that can handle it all
- Helical gearing with anti-backlash - precision control
- Easy-access game controls - control where you need it
- Responsive pedal unit - adjustable for maximum control
- Mounts securely - performance that stays where you want it
- 900° steering - for realistic turns on the track
- Steering wheel stripe - stay oriented in the right direction

Product Features

- Works with Xbox One and PC - enhance your console experience
- Driving Force is designed for the Xbox One console racing game titles. You may never race with a regular controller again after you experience.
- Dual-motor force feedback - experience every weight shift, and tire slip
- Feel your tires on every turn and type of terrain, sense under- or over-steer drifting. Powerful dual-motor force feedback realistically simulates force effects for precision response.
- Designed for distance - race-ready materials that can handle it all
- Driving Force handles the stress of racing action and is built for long-lasting reliability. Solid steel ball bearings in the wheel shaft and stainless steel paddle shifters and pedals make G920 the long-distance race wheel. It's covered in high-quality, hand-stitched leather, with the look and feel of a high-performance racecar wheel and it gives you a more comfortable, durable experience.
- Helical gearing with anti-backlash - precision control
- Helical gears are modeled after gears used in automotive transmissions to reduce unwanted noise and vibration. Anti-backlash keeps the wheel and pedals tight, maximizing your control. This steering wheel delivers exceptionally smooth, quiet steering action. G920 Driving Force racing wheel features a long lasting, reliable hall-effect steering sensor, using magnetic fields to sense the position of the wheel.
- Easy-access game controls - control where you need it
- Get even more control over your car's setup. G920 racing wheel incorporates the D-Pad and console buttons into the wheel so all your controls are right where you can reach them, while the semi-automatic paddle shifters help you execute smooth, accurate gear transitions on hairpin turns and straightaways.
- Responsive pedal unit - adjustable for maximum control
- Maintain a more realistic driving body position with the separate floor pedal unit with integrated throttle, brake, and clutch pedals. G920 Driving Force lets you comfortably accelerate, brake and change gears with the feel of an actual car.
- Mounts securely - performance that stays where you want it
- Drive fearlessly knowing the wheel won't shift during aggressive maneuvers. The racing wheel mounts securely to your table or racing rig via built-in clamps or screw mounting points.
- 900° steering - for realistic turns on the track
- The 900-degree lock-to-lock rotation of the G920 Driving Force means you can turn the wheel around two and a half times, hand over hand on wide turns. It's the same degree of motion as a steering wheel inside a car.
- Steering wheel stripe - stay oriented in the right direction
- Easily see if your steering is dialed in using a visual cue within your peripheral vision. The steering wheel stripe is a visual indicator of which direction the wheel is pointing.
