Key Selling Points

- Load cell brake
- Customizable pedals
- Modular design

Product Features

- Load cell brake
Better muscle memory. Optimal braking power. The load cell brake delivers a superior driver feel and consistent racing performance - thanks to pressure detection that precisely registers the applied brake force.
- Customizable pedals
Drivers can quickly adjust the feel of all three pedals. Swappable springs allow the clutch and gas to feel firmer or softer, with swappable elastomers for the brake: make it feel softer like a streetcar, or harder like in a race car. Adjust in seconds. No mechanics required - even if a coracer prefers a different setup. Both gas and brake use contactless hall effect sensors for greater longevity.
- Modular design
Move each pedal horizontally for the perfect spacing for each driver. Removable pedal modules make customization a breeze. Drivers can even match the configuration in their favorite race cars by inverting the pedal positioning in their custom cockpits.
