

Cisco wireless access point mounting bracket (AIR-ACCPMK3700=)

Cisco - Wireless access point mounting bracket - pole mountable

The Cisco wireless access point mounting bracket offers a straightforward solution for enhancing your network's reach and stability. Designed specifically for pole mounting, this hardware ensures your access points are securely and optimally positioned to provide maximum coverage. Its compatibility with PC systems allows for easy integration into your existing network infrastructure, making it an essential tool for businesses looking to expand their wireless access without the hassle of complex installations. With its focus on durability and ease of use, this mounting bracket is an ideal choice for ensuring your network remains robust and accessible.

Key Selling Points

Mounting hardware designed for pole installation ensures a secure and stable setup
Compatible with PC systems for a seamless integration into existing networks

Product Features

Effortless installation
Designed for ease, the wireless access point mounting bracket allows for quick setup on any pole, ensuring your network is up and running in no time.

Robust compatibility
Crafted to support PC systems, this mounting hardware seamlessly integrates with your existing technology infrastructure, making it a versatile addition to your network setup.
