

HPE (P65741-B21)

HPE - Enablement kit - ILO/NIC/M.2/COM - for ProLiant ML30 Gen11

The HPE enablement kit is a comprehensive solution designed to enhance the connectivity and performance of desktop computers and servers. This kit includes a variety of ports such as ILO, NIC, M.2, and COM, catering to a wide range of communication and storage needs. Its design is tailored for HPE systems, ensuring a seamless and reliable integration. By expanding the connectivity options and simplifying the installation process, this enablement kit is an essential addition for users looking to upgrade their HPE systems' capabilities efficiently.

Key Selling Points

- Expands desktop and server connectivity with additional ILO, NIC, M.2, and COM ports
- Designed for seamless integration with HPE systems
- Enhances system capabilities with minimal installation effort

Product Features

- Enhanced connectivity**
The enablement kit significantly expands the connectivity options for desktop computers and servers, providing ILO, NIC, M.2, and COM ports. This addition ensures versatile and efficient communication interfaces for a variety of computing needs.
- Seamless integration**
Designed specifically for HPE systems, this port kit integrates smoothly without disrupting the existing setup. Its compatibility with HPE products ensures a reliable and straightforward installation process, enhancing system capabilities with minimal effort.

Main specifications

Product Description	HPE - enablement kit - ILO/NIC/M.2/COM
Product Type	Enablement kit - ILO/NIC/M.2/COM
Designed For	ProLiant ML30 Gen11

Extended specification

General

Product Type	Enablement kit - ILO/NIC/M.2/COM
--------------	----------------------------------

Compatibility Information

Designed For	HPE ProLiant ML30 Gen11
