

Logitech Rally Camera Black Camera Mount (993-001904)

Logitech - Camera mount

The camera bracket provides flexibility to mount the camera on a wall directly above or below the display for a natural line of sight and eye contact with remote participants. For larger meeting spaces, the bracket can be inverted to position the camera near the ceiling for a more expansive view. A tripod screw and three-point pin system provide stability and helps keep the camera steady when the lens is in motion.

Key Selling Points

- Easy-to-follow installation with included screws and splitter case
- Designed for a broad range of camera models
- Enhances camera stability for professional and personal use

Product Features

- Effortless installation**
Designed for ease, this camera mount comes with screws and a splitter case, ensuring a straightforward setup process. Its user-friendly design allows for quick and secure mounting, making it an ideal choice for both professional and personal use
- Versatile compatibility**
As a versatile piece of mounting hardware, this product is engineered to support a wide range of camera models. Its adaptability makes it a valuable accessory for enhancing camera stability in various settings
