

Cisco (PWR-C1-715WDC=)

Cisco - Power supply - hot-plug / redundant (plug-in module) - 715 watt - for P/N: C9300-48UN-1E, C9300-48UXM-A-CAP, C9300L-24P-4X-10E, C9300L-48UXG4X-CAP

The Cisco power supply unit is a critical component for any network hardware setup, offering both reliability and power efficiency. With a hot-plug and redundant design, this plug-in module delivers 715 W of power, ensuring your network devices remain operational and secure. Its compatibility with network hardware makes it an essential addition, providing the necessary power supply with the flexibility of easy maintenance. Designed to support the demands of power supplies within the network infrastructure, it stands out as a resilient and efficient solution.

Key Selling Points

- Hot-plug capability for easy maintenance without downtime
- 715 W of power to support network hardware needs
- Redundant design for continuous operation
- Plug-in module form factor for easy integration

Product Features

- Efficient power supply**
Designed for seamless integration, this plug-in module ensures your network hardware remains operational with a robust 715 W of power. Its hot-plug capability allows for easy replacement without system downtime, making it a reliable choice for maintaining network integrity.
- Redundant design**
The power supply's redundant feature ensures that your network hardware continues to operate smoothly, even in the event of a power supply failure. This critical functionality provides peace of mind, knowing that your system is protected against unexpected power issues.
