Cisco (PWR-IE240W-PCAC-L=)

Cisco - Power supply - AC 100-240 V - 240 watt - for Catalyst IE3200 Rugged Series

The Cisco power supply is a critical component for network systems requiring reliable and efficient power delivery. With its ability to provide 240 W of power, it supports Power over Ethernet (PoE+) technology, allowing devices to receive both power and data through a single cable, simplifying installation and reducing cable clutter. This power supply is designed to be compatible with PC network hardware, ensuring a seamless fit for your existing setup. It operates within a wide input voltage range of AC 100-240 V, making it suitable for use in various global locations without the need for additional converters. Furthermore, its compliance with IP20 standards signifies a robust build quality, capable of withstanding challenging environments and ensuring a dependable power source for your network infrastructure.

Key Selling Points

240 W of power provided for efficient energy supply
Supports Power over Ethernet (PoE+) for simplified wiring
AC 100-240 V input voltage range for global use
Compatible with PC network hardware for seamless integration
IP20 compliance ensures durability in challenging conditions

Product Features

Enhanced compatibility
Designed specifically for network hardware, this power supply ensures seamless integration and operation within PC-compatible systems.

Efficient power delivery
With a robust 240 W of power, the device supports Power over Ethernet (PoE+) capabilities, enabling both electrical power and data to be delivered over a single cable to PoE+ enabled devices.

Versatile power input
Accommodating a wide range of input voltages, AC 100-240 V, and frequencies between 50 - 60 Hz, this power supply is designed for global compatibility, ensuring reliable performance across different power grids.

Durable design
Meeting the IP20 compliant standards, this power supply is constructed to withstand demanding environments, ensuring long-term reliability and safety for your network hardware.

Main specifications

Product Description	*Cisco - power supply - 240 watt*
Device Type	*Power supply*
Power Over Ethernet (PoE)	*PoE+*
Input Voltage	*AC 100-240 V*
Power Capacity	*240 watt*
Designed For	*Catalyst IE3200 Rugged Series*

Extended specification

General

Device Type	*Power supply*
Power Over Ethernet (PoE)	*PoE+ (IEEE 802.3at)*

Miscellaneous

Compliant Standards	*IP20*

Power Device

Input Voltage	*AC 100-240 V*
Frequency Required	*50 - 60 Hz*
Power Capacity	*240 watt*

Compatibility Information

Designed For	*Cisco Catalyst IE3200 Rugged Series*
