

Cisco (C9K-PWR-650WACL-R=)

Cisco - Power supply - AC - 650 Watt - for P/N: C9500-24Y4C-10A, C9500-32QC-10A, C9500-48Y4C-10A, C9500-48Y4C-10E, C9500-48Y4C-A-CAP

The Cisco 650W AC power supply offers a reliable and efficient solution for powering network hardware. This device is designed to meet the demands of modern network environments, providing a steady 650 W of power to ensure your systems run smoothly and without interruption. Its compatibility with AC power sources adds a layer of versatility, allowing for deployment in a variety of settings. Whether you're upgrading your current setup or building a new network infrastructure, this power supply is engineered to integrate seamlessly with Cisco network hardware, making it an essential component for any system.

Key Selling Points

- 650 W power output for reliable network hardware operation
- AC power compatibility ensures flexibility in deployment
- Designed for seamless integration with Cisco network hardware

Product Features

- Efficient power supply
Designed to deliver a robust 650 W, this power supply ensures your network hardware operates efficiently without interruption. Its compatibility with network hardware makes it a reliable choice for maintaining system uptime.
- Versatile voltage requirement
With the ability to operate on AC power, this device offers flexibility in various setups, ensuring your network hardware is powered in a wide range of environments.
