

ePIPE® Protects Luxury Beverly Hills Rooftop Pool's Piping System

The Peninsula Beverly Hills, a luxury hotel located at the center of Beverly Hills, near Rodeo Drive, provides world class accommodations and service to celebrities and other high profile guests. The hotel features an award winning rooftop pool and jacuzzi with cityscape views.

THE PENINSULA
BEVERLY HILLS

The Problem:

The Peninsula's pool and jacuzzi were experiencing leaks in the piping system.

The pipes ran through multiple floors from the mezzanine to the roof. The leaks were causing water damage to the rooms in the hotel, causing lost occupancy due to attempts to repair the leaks.

The Solution:

ePIPE "in-place" pipe restoration with minimal disruption to the hotel and its guests.

The patented ePIPE process was used to restore the piping system and prevent future corrosion and leaks. The ePIPE team lined hundreds of feet of 2½" - 3" pipes feeding the pool and jacuzzi in just a few days time.

Traditional repair methods would have been noisy, messy and require closing an entire floor of the hotel during the course of the repairs. Using ePIPE restoration, only two rooms were closed during the repairs and the hotel was back to 100% occupancy in a matter of days.

About ePIPE®

The patented ePIPE process restores pipes in-place, with an application of an epoxy barrier coating resulting in a restored epoxy lined piping system. The process is a solution for pinhole leaks, corrosion control and prevention of lead leaching from pipes for both commercial and residential piping systems. ePIPE service providers are located in the US, Canada, UK, Mexico, Europe and Russia. ePIPE products are sold under the brand names PurPipe®, Nu Pipe® and ePIPE®. For more information contact ACE DuraFlo Systems at www.epipeinfo.com or (888) 775-0220.
