

ePIPE Provides Senior Living Facility with Lead-Free, Leak-Free Pipes

The Problem:

Sunrise Senior Living in Severna Park, MD is a 137 home property with both assisted and independent living accommodations for seniors. The copper piping system was experiencing pinhole leaks and signs of corrosion which were causing disruption to residents and recurring maintenance costs. The property wanted a solution that would protect them from future leaks while meeting the needs of their residents with the least amount of disruption to their daily routines.

The Solution:

Sunrise Severna Park chose ePIPE, with the **fastest return to service product in the industry** and an impressive portfolio of restorations for senior living facilities.

ePIPE is the Clear Choice for Upscale Senior Living Properties

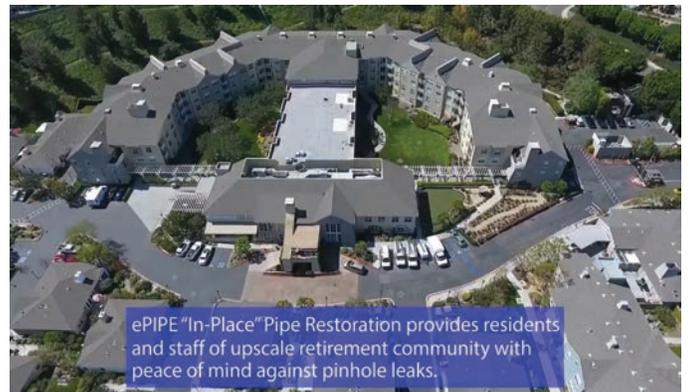

- Same-day return to service
- No displacement and minimal disruption to daily routines of residents
- Extensive portfolio of senior living clients
- Effectively reduces lead levels to well below the EPA guidelines with LeadSmart®
- Can be applied to both metallic and non-metallic piping systems

ePIPE is MORE than just Leak Protection

The patented ePIPE process is a proven solution for reduction of lead in drinking water due to lead pipes and/or lead contributors.

Using its patented process, ePIPE restored the piping system without severe disturbance to owners or damage to their units, all while **providing water back on to every unit at the end of each day**. Over the course of the project, ePIPE technicians were able to restore each riser in a single day without displacing any residents, quickly moving around the building to completion. The technicians worked with great skill, friendly demeanors and were able to accommodate the building's special needs.

ePIPE is the only small-diameter pipelining company that offers an NSF certified 90 minute immediate return to service lining material suitable for drinking water. **No other pipe restoration company comes close to same day "water on" service.**
