## PROJECTS

**Archr.ai:** We developed this web application to handle project management and payroll easier. With Archr you can use agile methodology to do the sprint planning, Demos, and Tracker Time worked on a task(requirement). I contribute to this project as a FullStack developer and adding some Generative AI concepts. I was using NextJs/ReactJs, Redux, Javascript, Tailwindcss, LangChain, NodeJs, MondoDB, Vectors, and Embeddings.  
<https://www.archr.ai>

**Learn Germany Language:** I developed this web application for a client whose idea was to build a school based here in Rwanda and enroll student through the web online. Now the web is live and fully working, student can register online then attend classes to learn Germany Language. For this project I used ReactJs, Javascript, Redux, Nodejs, MySQL, Sequelize, and Heroku.  
<https://www.akagera-rhein-academy.com/>

**Oncoai.io:** I worked on this project for a US based client, the idea of this project was to provide health agent for your specific needs in terms of medical. I was using React-Vite, Redux, Tailwindcss, OpenAI APIs.  
<https://landing-page-develop-u47ha3uopq-uc.a.run.app/>

**Devpulse:** I was working in a scrum team for this project which was handling the tracking of employee attitude and performance. I contributed as a FullStack Developer, I was using ReactJS, GraphQL, NodeJS, MongoDB.
