Tow Truck Application Guide

Due to the varying weights and equipment associated with these trucks, this should be used as a general guide.
Please contact our technical support team at (866) 898-0720 to discuss your specific application.

[1] Introduced lift may limit wheel lift to ground contact; suggested use with drop or extended vertical down reach booms.

[2] Remove rear factory auxiliary overload frame perch.

[3] To utilize upper shackle hole at rear, cut off lower hole from shackle length.

[4] For extreme heavy duty use only or carrier applications utilizing steel beds.

[5] Requires removing factory forward most spring clip.

[6] Requires PSP-19 for mounting, special order supplied at no cost; contact +1 (800) 898-0705.

[7] Ensure vertical clearance to carrier bed sub frame at rear.

[8] Do not use with factory installed air suspension.
