## Open Recalls

Recall #: R0131 | SANTE FE HOOD UPPER LATCH CABLE REPLACEMENT Recall Date: 2017 Jun 28

### Recall Description

On certain vehicles, the cable between the actuating lever for the secondary hood latch and the secondary latch may become corroded over time. This could cause the secondary hood latch to remain in the open position when the hood is closed. If the vehicle were to be driven with the primary hood latch disengaged, or primary hood latch is released while driving, the secondary hood latch may not hold the hood closed while the vehicle is in motion. If this were to occur, it could compromise the driver's ability to see the road and its users, as well as cause damage to the windshield. These issues could result in a crash causing injury and/or property damage. Correction: Dealers will replace the secondary hood latch cable.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/). (https://recall.hyundaicanada.com/)

Recall #: R0153 | Product Improvement Campaign - KSDS Update    Recall Date: 2018 Sep 01

**Recall Description**

Issue: Hyundai Auto Canada is conducting a Product Improvement Campaign that provides an update to the engine control module to detect potential problems before an engine fails. An engine failure would cause a sudden loss of power with an inability to restart. Safety Risk: A sudden loss of engine power could increase the risk of an accident. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to update the software for the engine control module. Note: The Transport Canada Campaign number was changed to 2019-640. Vehicles previously repaired under Transport Canada Campaign number 2019-130 do not require this software update. Recall #: R0165 | Accessory Trailer Module Replacement    Recall Date: 2020 Mar 05

**Recall Description**

Issue: Certain vehicles may be equipped with an accessory trailer wiring harness kit that could fail. Over time, moisture could enter the control module and cause a short circuit. Note: This recall only affects Hyundai Genuine Accessory trailer wiring harness kits that were manufactured by third parties and sold in Canada. These kits may have been ordered at the time of a vehicle purchase, or purchased separately from a dealer as an aftermarket accessory. Safety Risk: A short circuit could create a fire risk. This risk remains even when the vehicle is parked. Corrective Actions: Hyundai will notify owners by mail and instruct you to inspect your vehicle to see if it has an affected trailer wiring harness installed. If it does, Hyundai will advise you to take your vehicle to a dealer to install a redesigned trailer wiring harness. Hyundai recommends that you should park your vehicle outdoors, and away from other vehicles or structures until the recall repairs have been completed.

Recall #: R0190 | Hydraulic Electronic Control Unit (HECU)    Recall Date: 2021 Jun 25

**Recall Description**

Issue: On certain vehicles, brake fluid can enter the brake Hydraulic Electronic Control Unit (HECU) and cause a short circuit. Note: This recall replaces R0172 (Transport Canada recall 2020-410). Vehicles that were repaired under that recall also require this repair. Safety Risk: A short circuit could create a fire risk. Corrective Actions: Hyundai will notify owners by mail and instruct you to take your vehicle to a dealer to have the HECU inspected and replaced if necessary. The dealer will also replace the ABS multi-fuse. Hyundai recommends that you should park your vehicle outdoors, and away from other vehicles or structures until the recall repairs have been completed.

Recall #: R0212 -Exp | Reverse Park Aid Sensor Recall Date: 2022 Dec 16

#### Recall Description

Issue: On certain vehicles, the rear parking assist sensors (mounted in the rear bumper) could short circuit. Note: This recall replaces Transport Canada recall 2022-118. Vehicles that were already repaired under Hyundai recall R0212 don't require this repair. Safety Risk: A short circuit could create a fire risk. Corrective Actions: Hyundai will notify owners by mail and instruct you to bring your vehicle to a dealership to replace the rear parking assist sensor fuse and any defective sensors. Precautions: Until you can bring your vehicle to your dealer for service under this recall, Hyundai Canada recommends that you park your vehicle outside and away from structures. Owners that experience an inoperative cluster, a transmission shifter stuck in park, or a burning smell/smoking/melting at the rear of the vehicle are advised to have their vehicle inspected by a Hyundai dealer immediately.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/). (https://recall.hyundaicanada.com/)
