EVOKE WORKSPACE SEARCH

What is EWS (Evoke Workspace Search) and its capabilities?

EWS is a new generation, AI enabled optimized and consolidated open search tool. It offers a common search platform integrated with heterogonous data sources.

It's AI enabled cognitive algorithm helps the end user to search organization data from different sources like on cloud or on-premises sources effectively and accurately.

Why choose Evoke Workspace Search?

Leveraging the capabilities of deep machine learning semantic data models, EWS can search structured or unstructured data effectively with the help of AI enabled search engines.

It offers cognitive capabilities in the virtue of vision, speech, language, knowledge, and search areas. For instance, it offers customizable capabilities such as key phrase extraction, language detection, optical character recognition (OCR), image analysis, translation, role-based access control and many more.

It connects with various data sources including, on-premises, and at multi-cloud platforms.

The simple user interface enables the administrator to configure different data sources instantly.

Supported cloud platforms.

EWS supports all popular cloud platforms like Microsoft Azure, AWS and GCP.

EWS has the capability to integrate with Microsoft Search and enable the end user

to search content from different Office 365 products.

Supported data sources.

EWS supports data connectors from multiple cloud platforms.

Azure Connectors

Azure Table Storage

Azure Cosmos DB

Azure Data Lake Gen2

Azure Blob Storage

Sharepoint

Azure SQL

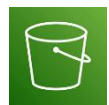

Other Azure Data Sources

AWS Connectors

Amazon RDS

Amazon S3

Dropbox

Google Drive

GitHub

Teams

salesforce

Adobe

JIRA

Slack

Other AWS Data Sources

GCP Connectors

Azure Event Hub

Twitter

Amazon DynamoDB

IBM Notes

Other AWS Data Sources

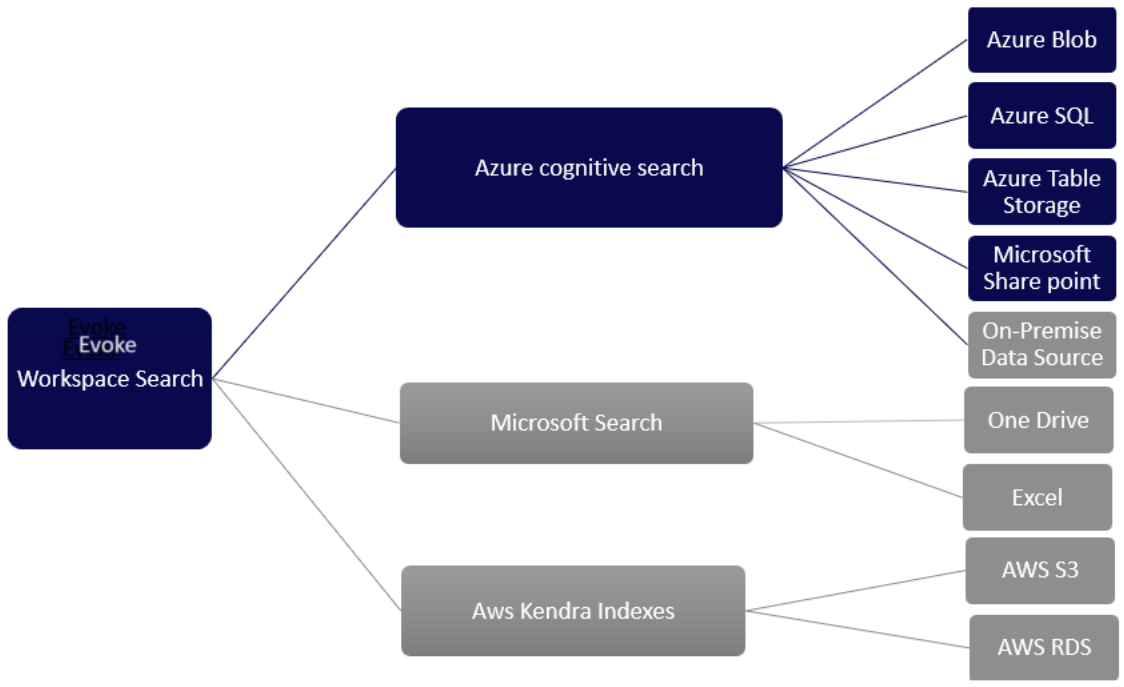

Custom Connectors

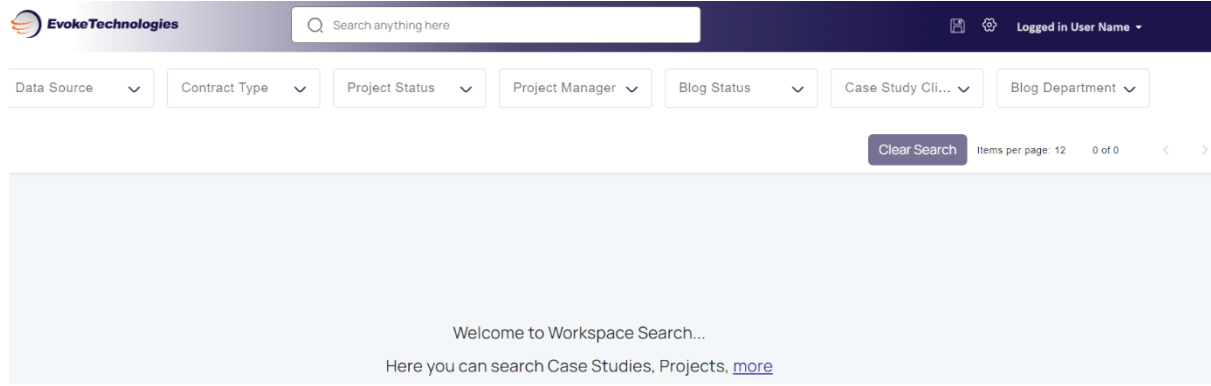

Custom Connector

EWS also supports custom connectors to establish an integration between on-premises data sources with the cloud search engines. This integration helps the cognitive search engine to bring on-premises data under its umbrella. Custom connectors can connect on-premises or on cloud data sources.

Process Workflow of EWS

Search Experience

EWS offers a simple but powerful search interface to search content from heterogenous platforms. It takes care and enables the administrator to securely configure different data sources without connecting to the cloud portals.

It provides flexibility to categorize searched data based on the user preferences. User has the ability to search data from a single source to make it more precise.

EWS supports Azure AD with MFA to authenticate its user securely.

About Evoke Technologies

Evoke Technologies is a global information technology services company offering innovative software development, IT outsourcing, and IT consulting services.

Over the years, global businesses have benefitted from our unparalleled experience and comprehensive capabilities to remain competitive. We enable businesses to reduce time-to-market, meet critical business needs, and drive transformational growth.
