

OBERON I & II Solar + Bess

Riverside County, California

Phoventus proudly supplied Owner's engineering services for the Oberon projects in Riverside, CA, showcasing ambitious plans to generate up to 700 megawatts of DC PV power connected at a powerful 500 KV rate with SCE network.

Leveraging state-of-the-art Tesla storage solutions consisting of 1000 MW hours or one GW hour, this large battery energy system will prove itself an impressive feat along Southern California's horizon.
