

SENTAERO 6

SENTAERO 6

VERTICAL TAKEOFF AND LANDING
MEETS ENDURANCE AND RANGE

*The Sentaero 6 (S6) is
an industry leading
mid-to-long range UAV,
optimized for Over the
Horizon Beyond Visual
Line of Sight*

The Sentaero 6 is the ultimate solution for Over the Horizon Beyond Visual Line of Sight (OTH BVLOS) operations, engineered for unmatched performance and reliability. Designed for maximum efficiency, it offers flight distances of up to 115 miles. With advanced technology, robust safety features, and intuitive controls, the Sentaero 6 enables effortless operation, allowing operators to focus on collecting valuable insights. This next-generation platform delivers exceptional value by optimizing operational efficiency, reducing costs, and enhancing safety for drone missions across industries.

**MAX RANGE:
90 MILES**

**MAX FLIGHT:
2 HOURS**

**MAX CRUISE SPEED:
45 MPH**

**EMPTY WEIGHT:
27LBS.**

**LAUNCH & RECOVERY:
VTOL**

**PAYLOADS:
DUAL-PAYLOAD**

**MAX WINDS:
20 MPH/30 MPH GUSTING**

**RANGE FROM OPERATOR:
CELLULAR DEPENDENT**

Kit Includes

Fully flight tested Sentaero UAS
Two flight battery packs
Battery charger
Rugged UAS storage case

GCS telemetry equipment
Choice of payload (price varies)
RTK positioning system upgrade available
Custom decals to promote your business
