Backup & Restore and data Synchronizer option are added this system

The screenshot displays the 'Backup and restore' section of the SALES ERP system. The interface includes a top navigation bar with 'Invoice', 'Receipt', 'Payment', and 'Purchase' buttons. A left sidebar contains a menu with 'Data Synchronizer' highlighted. The main content area features a 'Backup and restore' header with a 'Backup and restore' sub-header. Below this, there are two tabs: 'Backup and restore' (active) and 'Data Synchronizer'. The 'Backup and restore' section shows a 'Database backup' status of 'Available'. Under 'File information', it lists 'Filename: Backup.sql', 'Size: 199.38 KB (192792 bytes)', and 'Backup time: 03-03-2018 11:29:04 hours ago'. Three action buttons are visible: 'Restore backup' (blue), 'Download' (green), and 'Delete' (red). A callout box at the bottom right contains a clipboard icon and the text 'Backup and restore Backup and restore'.
