PROFILE

I am a highly skilled Full Stack Developer with expertise in a wide range of technologies including HTML, CSS, JavaScript, Tailwind CSS, React.js, Next.js, MongoDB, Node.js, and Express.js. My proficiency spans from creating dynamic and responsive web applications to building robust server-side solutions.

WORK EXPERIENCE

MERN Stack Developer

Edserves   2022-2023

- Create responsive, user-friendly interfaces using HTML5, CSS3, and JavaScript, and build dynamic web applications with React.js.
- Develop and maintain server-side applications and APIs using Node.js and Express.js, ensuring efficient data handling and processing.
- Design and manage databases using MongoDB, including schema design, data modeling, and performance optimization.
- Work closely with designers, product managers, and other developers to deliver features and improvements according to project requirements.
- Integrate frontend components with backend services, ensuring seamless communication between the client and server.

Full Stack Web Developer

Edify College Of IT   2023-continue

- Frontend Development: Developed responsive and user-centric web applications using HTML, CSS, JavaScript, React.js and Next.js.
- Backend Development: Built and maintained server-side applications with Node.js, Express.js, and MongoDB.
- Version Control: Utilized GitHub for version control, ensuring smooth collaboration and code management.
- Full Stack Development: Managed end-to-end development processes, integrating frontend and backend technologies.
- Project Contributions: Contributed to various projects focused on enhancing user experience and implementing modern web technologies.

FEATURED PROJECTS
