

HTML & CSS Basics

HTML (HyperText Markup Language) is the standard markup language for documents designed to be displayed in a web browser.

CSS (Cascading Style Sheets) describes how HTML elements are to be displayed on screen.

HTML Example:

```
<!DOCTYPE html>

<html>

  <head>

    <title>My First Web Page</title>

  </head>

  <body>

    <h1>Hello World</h1>

    <p>This is my first web page.</p>

  </body>

</html>
```

CSS Example:

```
body {

  background-color: lightblue;

}

h1 {

  color: white;

  text-align: center;

}
```

```
p {  
  font-family: verdana;  
  font-size: 20px;  
}
```
