UCL Swift			
	KF4A	26347218	The Swift KF4A is a highly advanced, All-In-One active cladding alignment fusion splicer, designed to per-form the major fi ve functions systematically: stripping, cleaning, cleaving, splicing and protecting. The KF4A is the best fi t for fusion splicing and fusion splice-on connectors (FSOC) of FTTx network applications. It eliminates critical issues common with conventional mechanical connectors including low quality, weak durability and high maintenance costs.
	K33A	26471152	The Swift K33A is a premium, All-In-One IPAAS core alignment splicer that provides the best workability and the integration of the fi ve major functions: strip-ping, cleaning, cleaving, splicing and protecting. This compact and rugged fi ber splicer is ideal for medium and long-range optical circuits, LAN, CATV, FTTx. With a rotating blade that can allow up to 77,000 cleaves, the K33A combines long-lasting durability with high precision performance.

MANUFACTURER	MANUFACTURER NUMBER	GBID	DESCRIPTION

FUSION SPLICERS CONTINUED

UCL Swift Continued

	KR12A	26471153	The Swift KR12A is an All-In-One Ribbon Splicer that offers a strong option for in-fi eld fi ber splices that delivers superior optical performance and improved productivity. Integrated with fi ve functions in one unit, the KR12A can strip, clean, cleave, splice and protect in less time and with better results. In addition, the rotating blade life can handle up to 77,000 fi ber splices and unit maintenance can be achieved through an online connection.
