ENGINEERED FOR CRITICAL IN-BUILDING CONNECTIVITY
Public Safety | Cellular Signal Boosters | Fiber DAS

WILSON CONNECTIVITY

PUBLIC SAFETY	CELLULAR SIGNAL BOOSTERS	FIBER DAS
		
UL 2524 / NFPA-compliant BDAs for public safety and first responder coverage	High-performance cell signal repeaters for seamless in-building coverage	Scalable fiber-optic DAS for mission-critical, multi-zone coverage

WHY WILSON CONNECTIVITY?

- ✓ UL 2524 / NFPA compliant public safety BDAs
- ✓ Enterprise-grade cellular repeaters
- ✓ Hybrid fiber DAS for scalable coverage
- ✓ Trusted by integrators nationwide

Contact your Graybar representative to specify Wilson Connectivity for your next project.

5G ENTERPRISE SOLUTIONS

SureCall offers one of the most comprehensive portfolios of 5G solutions in the industry - hybrid-fiber DAS (FCC Part 20), enterprise 5G/LTE boosters, C-band and mmWave technologies.

- Large-scale and multi-building coverage
- Reliable 5G ultra-wideband connectivity
- Next-gen data speeds without fiber backhaul

Contact your Graybar rep to learn more about SureCall's full line of 5G wireless solutions.

Three Key Applications For Your Wireless Strategy

1

Cellular

Enable wireless voice and data devices to operate on an in-building network.

5G will change the way people use their mobile devices, and your building's network infrastructure must evolve to keep up.

2

Public Safety

In an emergency, communication is key – would your building's network get in the way of:

- Anyone, with any carrier, dialing 911 from their cell phone
- First responders communicating with voice and data anywhere in your building
- Everyone receiving emergency mass notification texts

3

Private Wireless Networks

A private network puts you in control of your building's connectivity and mission-critical functions. We can help you develop a comprehensive private wireless strategy that creates a secure network utilizing Wi-Fi, IoT and CBRS spectrum.

You can count on Graybar to provide the services needed to help keep your project on time and on budget.

Product Kitting and Wire Cutting

Graybar has a wide range of innovative kitting and wire cutting services. We can help develop special packaging for a few items, or kit, crate and ship large components (built-to-stock or to-order).

Material Staging

Whether in one of Graybar's 290 locations or a custom warehouse at your site, we have the ability to store stock or non-stock material for delivery to you at a specified date and time. This gives you the comfort that you have readily available inventory, prevents delays and can reduce costs.

Job Trailers

Graybar offers the convenience of Mobile Mini, Inc. portable storage units and office trailers as part of its jobsite inventory management solutions.

Graybar SmartStock®

An inventory management system that uses best-in-class technology to manage all of your jobsite materials. It includes automated replenishment, in-depth reporting capabilities and adjustable material levels to help create a more streamlined process that can save you time and costs.

TruckStock

A point-of-use inventory management system using fleet vehicles to provide secure and immediate access to the materials you need, when you need them. Includes automated replenishment, in-depth reporting capabilities with exclusive user-defined fields, and cycle counts.

Graybar Financial Services®

Lease financing options, working capital loans and Wireless as a Service (WaaS).

Technical Services

Benchmark signal testing, design, commissioning, monitoring and reports.
