

Graybar Construction Technology Services

Take control of your construction materials procurement with Graybar's advanced Construction Technology Integration (CTI) services. We work with top CTI systems that contractors are already using to help simplify your ordering, quoting, and invoicing, helping you win back time and gain better visibility on your jobs.

Work Smarter with Leading Construction Technology Tools

Graybar integrates with industry-leading third-party platforms that contractors are already using, including:

PARSPEC

Get fast, high-quality quotes, generate lighting submittals, and use AI-powered technology for recommendations on products.

KOJO

Connect your field and office for seamless ordering and material tracking.

Remarcable

Order electrical materials faster, from estimating to fulfillment.

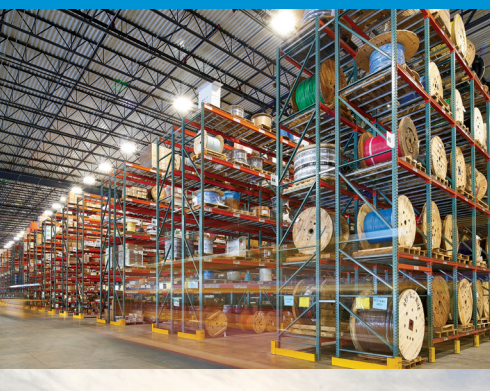

Inspire

Power your prefab workflows with real-time procurement access.

Supplier Xchange™

Trimble

Receive up-to-date price files with Supplier Exchange. Better manage purchasing and tracking of materials with Supplier Exchange Enterprise.

Simplify Your Entire Purchasing Cycle

Graybar helps you streamline and simplify your purchasing cycle from start to finish. We help with:

- Planning schedules with release capabilities
- Purchase order acknowledgements
- Pricing and availability
- Electronic invoicing
- Request for quotation
- Full system data visibility and acknowledgements
- Advanced shipping notices

Why Contractors Choose Graybar

Fewer Errors – Eliminate manual data entry

Faster Cycle Times – Reduce delays with real-time updates

Stronger Relationships – Free up your team to focus on field productivity

Flexible Integrations – Use your preferred construction tech stack
