## **Sustainable Decommission Solution**

Kimball International®  
collaborates with Green  
Standards to provide a  
sustainable solution for the  
redistribution of surplus  
workplace furniture, equipment,  
and supplies.

---

## About Green Standards

Green Standards is a specialized environmental firm that has helped large organizations divert 85,000 tons of surplus office, hospitality, and health furniture; equipment; and supplies from landfill (a 98.6% landfill diversion rate). As a result, clients across North America have generated \$32M+ of in-kind donations cumulatively to 5,000+ non-profits, schools, and charitable organizations in their communities.

---

## Strategic Redistribution

Green Standards employs a multi-channel disposition of resale, recycling and donation to ensure 95% landfill diversion.

## Resale

of high-value items to bring revenue into the project.

## Recycle

of high-metal content items to offset cost and reduce waste.

## Donation

of items to avoid landfill and offer resources to community organizations.

---

## Reporting & Documentation

Green Standards provides industry-leading asset tracking, sustainability and community impact reporting via cloud-based web portal. These deliverables support clients with ongoing internal and external PR efforts and stakeholder communications.

### Inventory Tracking

Inventory tracking of each item and its end-use

### Community Impact Stories

Photos, testimonials and more, provided by beneficiaries

### Environmental Data

Measuring landfill diversion, CO2 equivalent offset and more

### Liability Protection

Transfer of title frees clients from all future liability associated with distributed assets

---

## Save Time & Money

Through industry-leading expertise, proprietary technology, innovative strategies and diligent planning, project costs are equal or less than conventional landfill disposal.
