

FOOTINGS COLLABORATIVE TABLES DESIGN PERSPECTIVE

People need collaboration spaces that meet their specific needs. From unique spaces to unique configurations, the Footings table collection addresses today's collaborative society. Inspired by interaction and style, Footings' new base designs and top shapes add creative and smart solutions to National's table offering.

"When I examined the many ways tables are used, it was clear to me that we needed to branch out, to think differently, to create unique shapes and designs that really address today's needs. As more and more spaces are becoming fluent and used for multiple activities, we needed to develop tables and bases that could beautifully meet those needs."
