

Jury Base Solutions

Jury base seating provides swivel rotation that is suited for any courtroom environment or lecture hall. Available with knee tilt or swivel tilt, this base provides control for individual comfort and prevention of fatigue during long periods of sitting. Jury base seating promotes active observation and critical learning, while keeping the space visually organized and controlling the permanent placement and spacing of the seating. Arlington's traditional appeal, refined character, and modern comfort is a great solution in spaces that require jury base seating.
