

# SWIFT LOUNGE COLLECTION DESIGN PERSPECTIVE

The Swift collection of lounge furniture offers a multitude of shapes to accommodate straight or serpentine solutions. The lounge seating and tables can be combined for endless configurations in grand or modest spaces. The base options offer mixed materials, mobility, and plinth choices to meet style and function needs. Add even more design appeal with Swift's vertical tufting stitch option. Swift delivers sophistication while its wide breadth of line provides design versatility. Swift outfits lobbies, reception areas, cafés, common areas, collaborative touchdown spaces, and so much more.

“Swift embodies multiple materials to achieve a design that can be taken from a single unit to a flowing space solution. During the design process, and throughout Swift's development, we focused on providing a comfortable and flexible solution that could solve a wide variety of needs – aesthetically, spatially, and functionally.”
