

TARVER COLLECTION

DESIGN PERSPECTIVE

The Tarver collection of tables, storage, and mobile ancillary pieces brings industrial beauty to any space. Featuring a rustic design with exposed metal fasteners, Tarver applauds the timeless blend of craftsmanship and geometric angles, and celebrates the beauty of artisanal veneer and rugged steel.

“Inspired by the revitalization and renovation of late 19th century industrial warehouse architecture, Tarver merges the natural characteristics of metal and wood to create rustic showpieces. The simplistic and repetitive wood and steel support beams and trusses that were used to create those warehouses influenced my vision of Tarver. Building from those monumental structures, Tarver’s details were developed and modernized for commercial interiors.”
