

interwoven™

A modern, black folding chair with a silver frame and armrests is the central focus. The chair has a black seat and backrest with white horizontal slats. It is positioned in a bright room with light wood flooring. In the background, another similar chair is visible, leaning against a white wall. The overall aesthetic is clean and minimalist.

WREN™

Wren's innate strength durably supports additional seating in waiting, lounge or dining areas. It folds and stores on the wall to transform rooms for multipurpose use.
