EMPATHY BY DESIGN

The path toward healing isn't just about medicine. It's an interconnected journey involving mind, body, and spirit, strengthened by the support given from one's caregivers, family, and friends. When we nurture all aspects of this journey in tandem—optimal healing occurs.

Addressing this collective experience of healing, Embra offers a holistic, human-centered approach for healthcare environments. Providing warmth, comfort, and aesthetic harmony, Embra brings a sense of humanity back to healing spaces to enrich the patient experience and enhance the healing journey.

DESIGN STORY -

# Meet the Designers

5D Studio is a multidisciplinary studio with expertise in graphic design and contract furniture and interior design. Behind the leadership of David Ritch and Mark Saffell, 5D is founded on the passion for design. With David studying Urban Planning and receiving a BS in Industrial Design, and Mark's BFA in Interior Architecture, the two have been involved in various furniture projects and have collaborated with a broad range of furniture clients. Their experience spans highly developmental ergonomic task seating to more fashion driven soft seating products, such as Embra. Mark & David take pride in solving problems, understanding their clients, and providing the best possible solution for their needs.

DESIGN STORY —

# Distinctive with Meaningful Details

Tailored for comfort, executed with quality and craftsmanship—Embra is thoughtfully designed down to the very last detail. With soft, rounded edges incorporated throughout and a light-scale aesthetic, Embra embodies clean, modern design to create visual harmony.

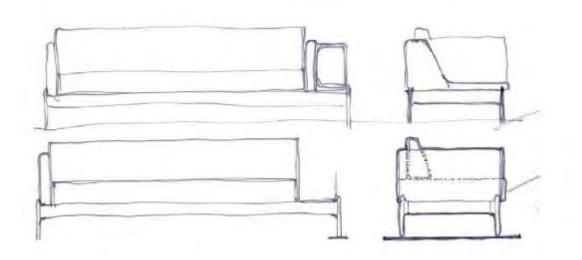

DESIGN STORY

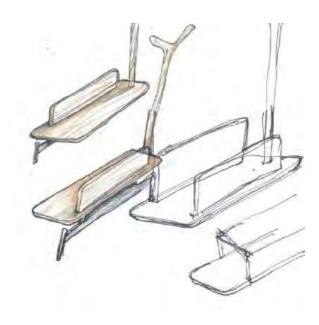

# A Platform for Possibilities

#### Effective healing begins with empathy.

Embra responds with a comprehensive solution centered around human needs and the collective experience of healing.

"A tailored platform that can be expanded upon with essential elements as needed Embra transforms utilitarian and institutionalized spaces into empowering healthcare environments with unlimited possibility."

WHY EMBRA

# A Holistic Perspective

**interwoven**<sup>m</sup>

Embra responds to the diverse and rigorous needs of healing environments with a holistic approach that marries warmth, comfort, and design aesthetics with performance and efficiency to enhance the patient and caregiver experience and improve outcomes for healthcare organizations.

## **interwoven**<sup>™</sup>

#### PERSON-CENTERED

Counter to their mission of advancing the healing process, healthcare settings often induce stress and anxiety for patients. Born out of thoughtful, peoplecentered design, Embra incorporates design features that support human responses and behaviors, bringing humanity back into healing environments.

By blending the comforting and inviting elements of residential design with the functional criteria needed for high-performance healthcare environments, Embra creates healing spaces that enhance experiences for both patients and caregivers.

#### DESIGN DETAILS

- ► A holistic solution that addresses multiple healthcare setting needs with fewer pieces to inventory and move
- Modularity makes it efficient for facilities to organize and expand community spaces
- Comfortably support patients, family, and staff in moments of interaction or quiet reflection
- Soft, rounded edges provide comfort and serve as a practical safety feature
- Decorative but purposeful elements solve needs for lighting, surface, and storage while still being space efficient
- Addresses all functional criteria for ergonomics, health and safety, infection control, stability, and durability
- Platform design lends itself to easy customization for length to accommodate any size space

#### DESIGN DETAILS $\ominus$

- ► Fine details such as meticulously crafted stitching and soft, rounded edges convey a custom quality
- Raised platform design provides a lighter, less institutionalized aesthetic and scale to healthcare environments
- Modularity allows infinite layout options with a minimalist design that doesn't result in visual chaos
- Material selections bring a warm residential quality while still adhering to healthcare functional requirements
- Beautifully and purposefully designed accessories solve needs for lighting, surface, and storage while still being space efficient
- Low profile of the sleeper allows placement in front of windows without obstructing views

IDEA STARTERS

## Multifaceted

Embra enhances the patient experience to positively impact health and wellbeing across a spectrum of healthcare settings, from waiting areas and consult spaces to patient rooms and caregiver respite areas.

#### COMMUNITY SETTINGS

### Communal Hub

A back-to-back setting of Embra is the perfect centerpiece for a community atmosphere. Paired with other products, Embra can be the center of a space that promotes connection, collaboration, focus and productivity.

#### PATIENT ROOMS

The Right Fit

With multiple lengths and configurations, Embra can be specified to maximize space in any footprint to give families a comfortable space to connect and participate in care.

#### PATIENT ROOMS

## Family Centered

Blend warm and inviting family zones into patient rooms to promote faster patient healing, reduced stress, improved communication and increased patient satisfaction.

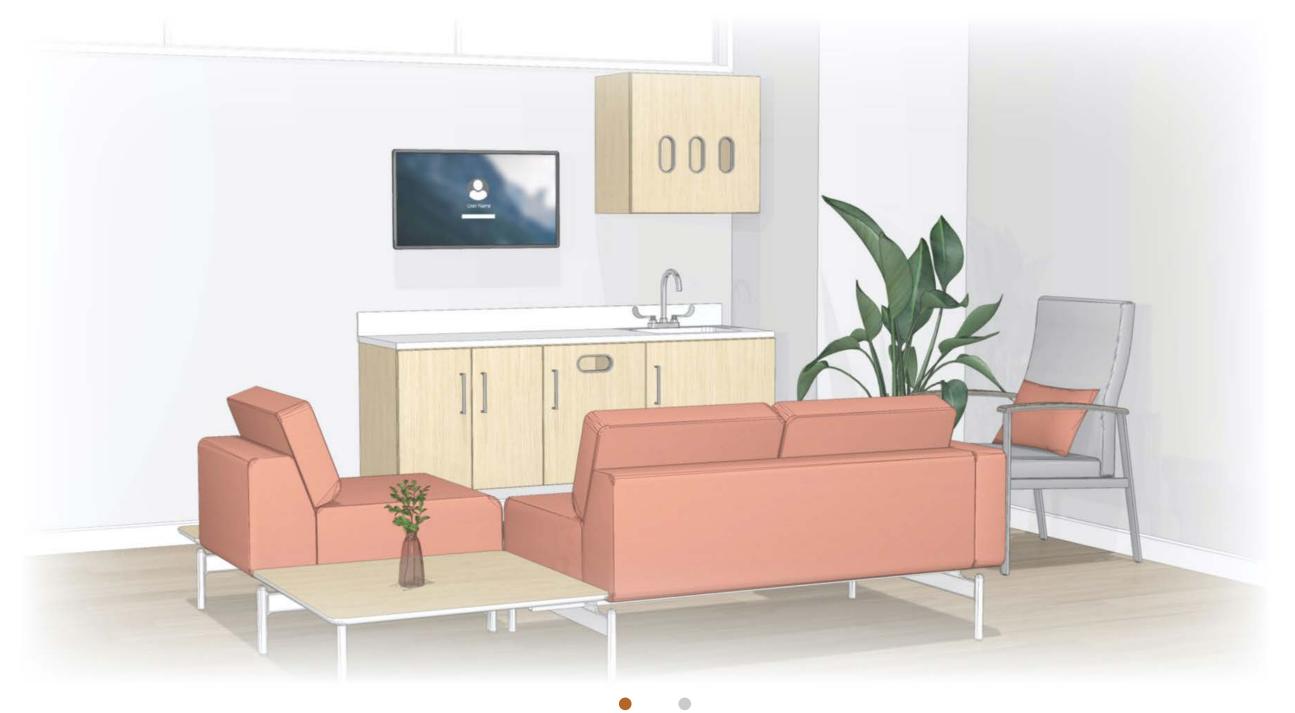

#### HYBRID CARE

Hybrid Exam + Consult

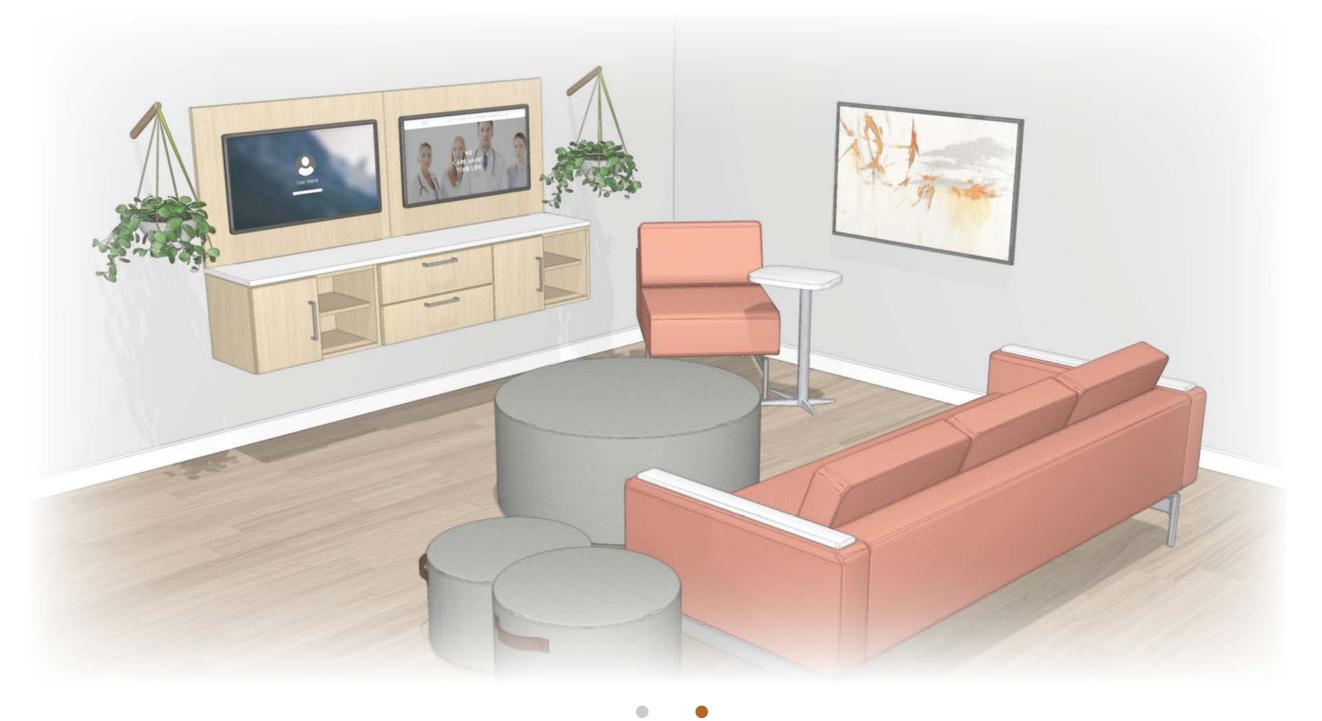

Balancing consult with exam needs enhance the effectiveness of the provider while promoting patient/caregiver equality and collaboration.

#### HYBRID CARE

## Hybrid Imaging + Consult

Patients want more personalized time with specialists. Create an environment where caregivers can engage with patients at a one-on-one level.

CAREGIVER SPACE

Recharge

Offering an appealing retreat to support the mental, physical and emotional wellbeing of caregivers, provides enhanced rest, renewal and sense of community during periods of free time.

CAREGIVER SPACE

Relax

Provide an area that encourages rest and renewal during periods of free time to ensure that staff members are refreshed to resume work.

**DESIGN PLANNING** 

## Cohesive Elements

Embra's purposefully and cohesively designed elements support visual consistency and broad utility across a variety of healthcare settings to create places of realized healing potential.
