99K44TLA	72 LED lights	2	44	1/2	\$694	33721

Pricing

Ships in 10 Days

Main TOC	▶ See page 1
Accessories & Filing TOC	2
Surface Materials	95

Standard Includes

Starter Unit

- Fixture
- Two-piece 12' black cord with an inline 4 1/2"W x 2 1/8"D x 1 1/8"H 65-watt brick power supply and plug
- Mounting kit

Add-On Unit

- Fixture
- One 8" black interconnect cord
- One 30" black interconnect cord
- Mounting kit
- Two adhesive managers

Interconnect Guide

Task Light Length	Watts per Unit	Max. No. of Units	Total Watts
17"	8	6	48
31"	18	3	54
44"	26	2	52

IMPORTANT: Different task light lengths can be combined in the chain; however, the total wattage cannot exceed 54. For example, one 17" unit (8 watts) plus one 44" unit (26 watts) = 34 watts which is below the maximum.

Q99K7224PVSOBP	5	71 ¹³ / ₁₆	24	5/16	5	3	4	\$648	33721

Standard Includes

- Screen: semi-opaque, fluted polycarbonate
- Clear U-channel edge molding on all sides of screen
- Metal brackets (feet) with clear rubber bumpers on bottom: paint

Installation

- Screen and brackets ship in the same box
- Remove protective film from screen
- Pressure fit screen into brackets and set in place

Tips

- When ordering both front and side set-on-surface screens, size down for side screens to avoid interference
- The number of brackets (feet) is determined by screen width

How to Specify

- 1 Model
- 2 Bracket paint designator:
462 = Cinder
501 = Platinum Metallic

Standard Includes

- Screen: semi-opaque, fluted polycarbonate
- Clear U-channel edge molding on all sides of screen
- Metal edge-mount brackets: paint
- Attachment fasteners

Installation

- Screen and brackets ship in the same box
- Remove protective film from screen
- Attach brackets to the screen
- Use fasteners to attach to surface
- Two people recommended

Tips

- Fits on 1³/₁₆" and 1⁹/₁₆" worksurface thicknesses
- When ordering both front and side edge-mount screens, size down for side screens to avoid interference
- The number of edge-mount brackets is determined by screen width
- Wire gap bracket provides ¾" gap for cord management

How to Specify

- ① Model
- ② Bracket application:
FL = Flush
WG = Wire gap (+\$42)
- ③ Bracket paint designator:
462 = Cinder
501 = Platinum Metallic

Standard Includes

- Screen: 405 Designer White TFL with matching 2mm edgeband
- Metal clamp brackets: 501 Platinum Metallic

Installation

- Brackets ship attached to screen
- Tighten thumb screw to secure to surface

Tips

- Fits on 3/4" and 1³/₁₆" worksurface thicknesses
- Sized to avoid pinch points on height-adjust surfaces and when both front and side screens are specified
- 3/4" gap between screen and worksurface allows for cord management

UNIVERSAL METAL FILING

Locking Information

Fundamental and LF Series can be specified as:

- Key random
- Key specific

Lock cores are shipped separately for field installation.

Black lock cores with black hinged keys are identical to the ones available on the following Casegoods products:

- Definition
- Priority
- Transcend

Silver lock cores are matte nickel and have black hinged keys. These lock cores and keys are identical to the ones available on the following products:

- Definition
- Priority

Key Random Option:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KSCD001 to KSCD300 (black) or KSCG001 to KSCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation.

KSCD001 KSCD101 KSCD025

KSCD001 KSCD223

KSCD001 KSCD198

With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific Option:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KSCD001 to KSCD300 (black) or KSCG001 to KSCG100 (silver).

KSCD005

KSCD005

KSCD005

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

How to Specify

- ① Model
- ② TFL designator

PRIORITY™ ASSEMBLED CASEGOODS

Locking Information

Locking is optional on all storage units. When locking is selected, locks can be specified as:

- Key random with a black lock core with black hinged key (KRB);
- Key random with a silver (matte nickel) lock core with black hinged key (KRS); or
- Key specific (KS)

Black lock cores with black hinged keys are identical to the ones used with other casegoods and systems products.

Silver lock cores are matte nickel and have black hinged keys. These lock cores and keys are identical to the ones used with Definition and Fluent series.

Key Random:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation.

KCC*001 KCC*002 KCC*001

KCC*001

With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

KCC*005 KCC*005 KCC*005

KCC*005

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

 - Special wood finishes
 - Customer-specified laminate (CSL)
 - Customer-specified paint (CSP)
 - Fabric application and colorways
 - Customer's own material (COM) overview
 - Alliance program
 - TB133 process

IMPORTANT: Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminated surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

VINYL (PVC)

Applies to:

- Xsede Height Adjust desk worksurface rim
- Dock Meeting round table top rim
- Priority worksurface rim
- Theo table top rim
- Footprint file tops for metal filing
