

# Our commitment to healthier hospitals.

**NATIONAL PRODUCTS WILL MEET THE HEALTHIER HOSPITALS V2.3 BY FOLLOWING THESE GUIDELINES:**

---

## **FORMALDEHYDE**

National Office Furniture products are compliant with the low emissions criteria of the ANSI/BIFMA Standard Method 7.1-2011 (R2016) and ANSI/BIFMA e3-2014 Furniture Sustainability Standard, Sections 7.6.1 and 7.6.2 (seating also meets section 7.6.3). This compliance has earned our products the Indoor Advantage™ Gold label. Additionally, our products are certified to the LEVEL® label for meeting the low emissions criteria and a variety of other stringent requirements. Certificates are available at [scsglobalservices.com](http://scsglobalservices.com).

---

## **PER- AND POLY-FLUORINATED ALKY/ SUBSTANCES (PFAS)**

Casegoods and tables from National are PFAS free. Seating is PFAS free unless ordered in a fabric that contains PFAS. Customers are responsible for Customer's Own Materials (COM) content. PFAS can be found in stain repellent treatments.

---

## **POLYVINYL CHLORIDE (PVC)**

National's wood veneer casegoods and tables are PVC free. Laminate casegoods and tables also comply with Healthier Hospitals requirements. PVC components are less than 1% of the total weight of workstation or table. Our seating products are PVC free, unless ordered in vinyl upholstery.

---

## **ANTIMICROBIALS**

National's products listed meet the Healthier Hospital requirements.

---

## **FLAME RETARDANTS**

Products qualify unless ordered with the TB-133 option (which requires use of flame retardants) and select vinyls and polyurethanes. Fabrics with no added flame retardants can be found at [NationalOfficeFurniture.com](http://NationalOfficeFurniture.com) under the Materials tab (Seating Upholsteries).

A PRACTICE GREENHEALTH PROGRAM

National's portfolio includes a wide variety of products which meet the goal of the healthier hospitals V2.3.
