

# OUR PRODUCTS REFLECT STEWARDSHIP SUSTAINABLE PRODUCTS

Product stewardship is our focus. We actively pursue ways to minimize the impact of our products on the environment. This means designing products that save resources, have longer life, use clean manufacturing, meet indoor air requirements, recycle easily and include many other sustainable attributes.

Our products earn the stringent Indoor Advantage™ Gold mark from Scientific Certification Systems (SCS) for meeting Indoor Air Quality criteria, which can assist organizations seeking LEED® certification. Additionally, our products meet the multi-faceted criteria set forth in the ANSI/BIFMA e3 Sustainability Standard and are certified to the LEVEL® program. Products can be awarded LEVEL® 1, LEVEL® 2 or LEVEL® 3, with LEVEL® 3 being the highest award a product can achieve. We are proud that virtually all of our products are certified to LEVEL® 2 or 3.

National's manufacturing facilities are registered to the ISO 14001 standard. This management tool enables us to identify and control the environmental impact of our operations, continually improve our company's environmental performance and systematically set environmental objectives and demonstrate their achievement.

The environmental impact of a product throughout its entire life is important. We collaborate with Green Standards to provide a sustainable decommission solution for the redistribution of surplus workplace furniture, equipment, and supplies. This strategic partnership diverts products from landfills at a 98.6% diversion rate, and donates products to non-profits, schools, and charitable organizations.

National participates in the Practice Greenhealth program called Healthier Hospitals. Our portfolio includes a wide variety of products which meet the Safer Chemicals Challenge of the Healthier Hospitals Initiative Version 2.3.
