# Brick House Blue is a dynamic space where teams, individuals, and organizations can discover, build, and grow.

---

Brick House Blue offers the perfect space for coworking, team workshops, strategy sessions, speaking engagements, and networking events. The purpose of their space is to be a home away from home that empowers teams to break away from the everyday and be inspired to think outside the box.

The owners wanted the space to feel relaxed and non-corporate, yet still professional. They were looking for a modern aesthetic that mixed work spaces with casual areas, so they could offer their guests the opportunity to choose how they want to work. The owners not only wanted to offer closed office space for lease, but also wanted to be able to offer more open environment, non-assigned spaces and “think tank” areas that corporate clients could use for off-site meetings and events.

Kimball International collaborated with the design firm, WSA Studio, and the owners of Brick House Blue early in the process to design solutions that would meet the goals of the new space, while providing a modern aesthetic that would be inviting and rich in design. In doing so, they chose tables with a height adjust feature that gives the users the option to choose how they wanted to work in those touch down areas. They also provided an extremely comfortable seating solution by using rich color tones that made the space feel warm and welcoming to all who occupied it.

#### PRODUCTS SHOWN

Bloom® Lounge and Tables / Joelle™ Table / Joya™ Task Seating / Xsede® Height Adjust

The open environment area was furnished with comfortable lounge chairs that provided a unique arrangement for casual meeting space while also promoting collaboration. Kimball International successfully achieved the inviting design by using colors that declared a statement of warmth but added a bold pop of color that provided cohesiveness to the setting.
