Empowering Patients, Caregivers, & Guests

 Kimball International

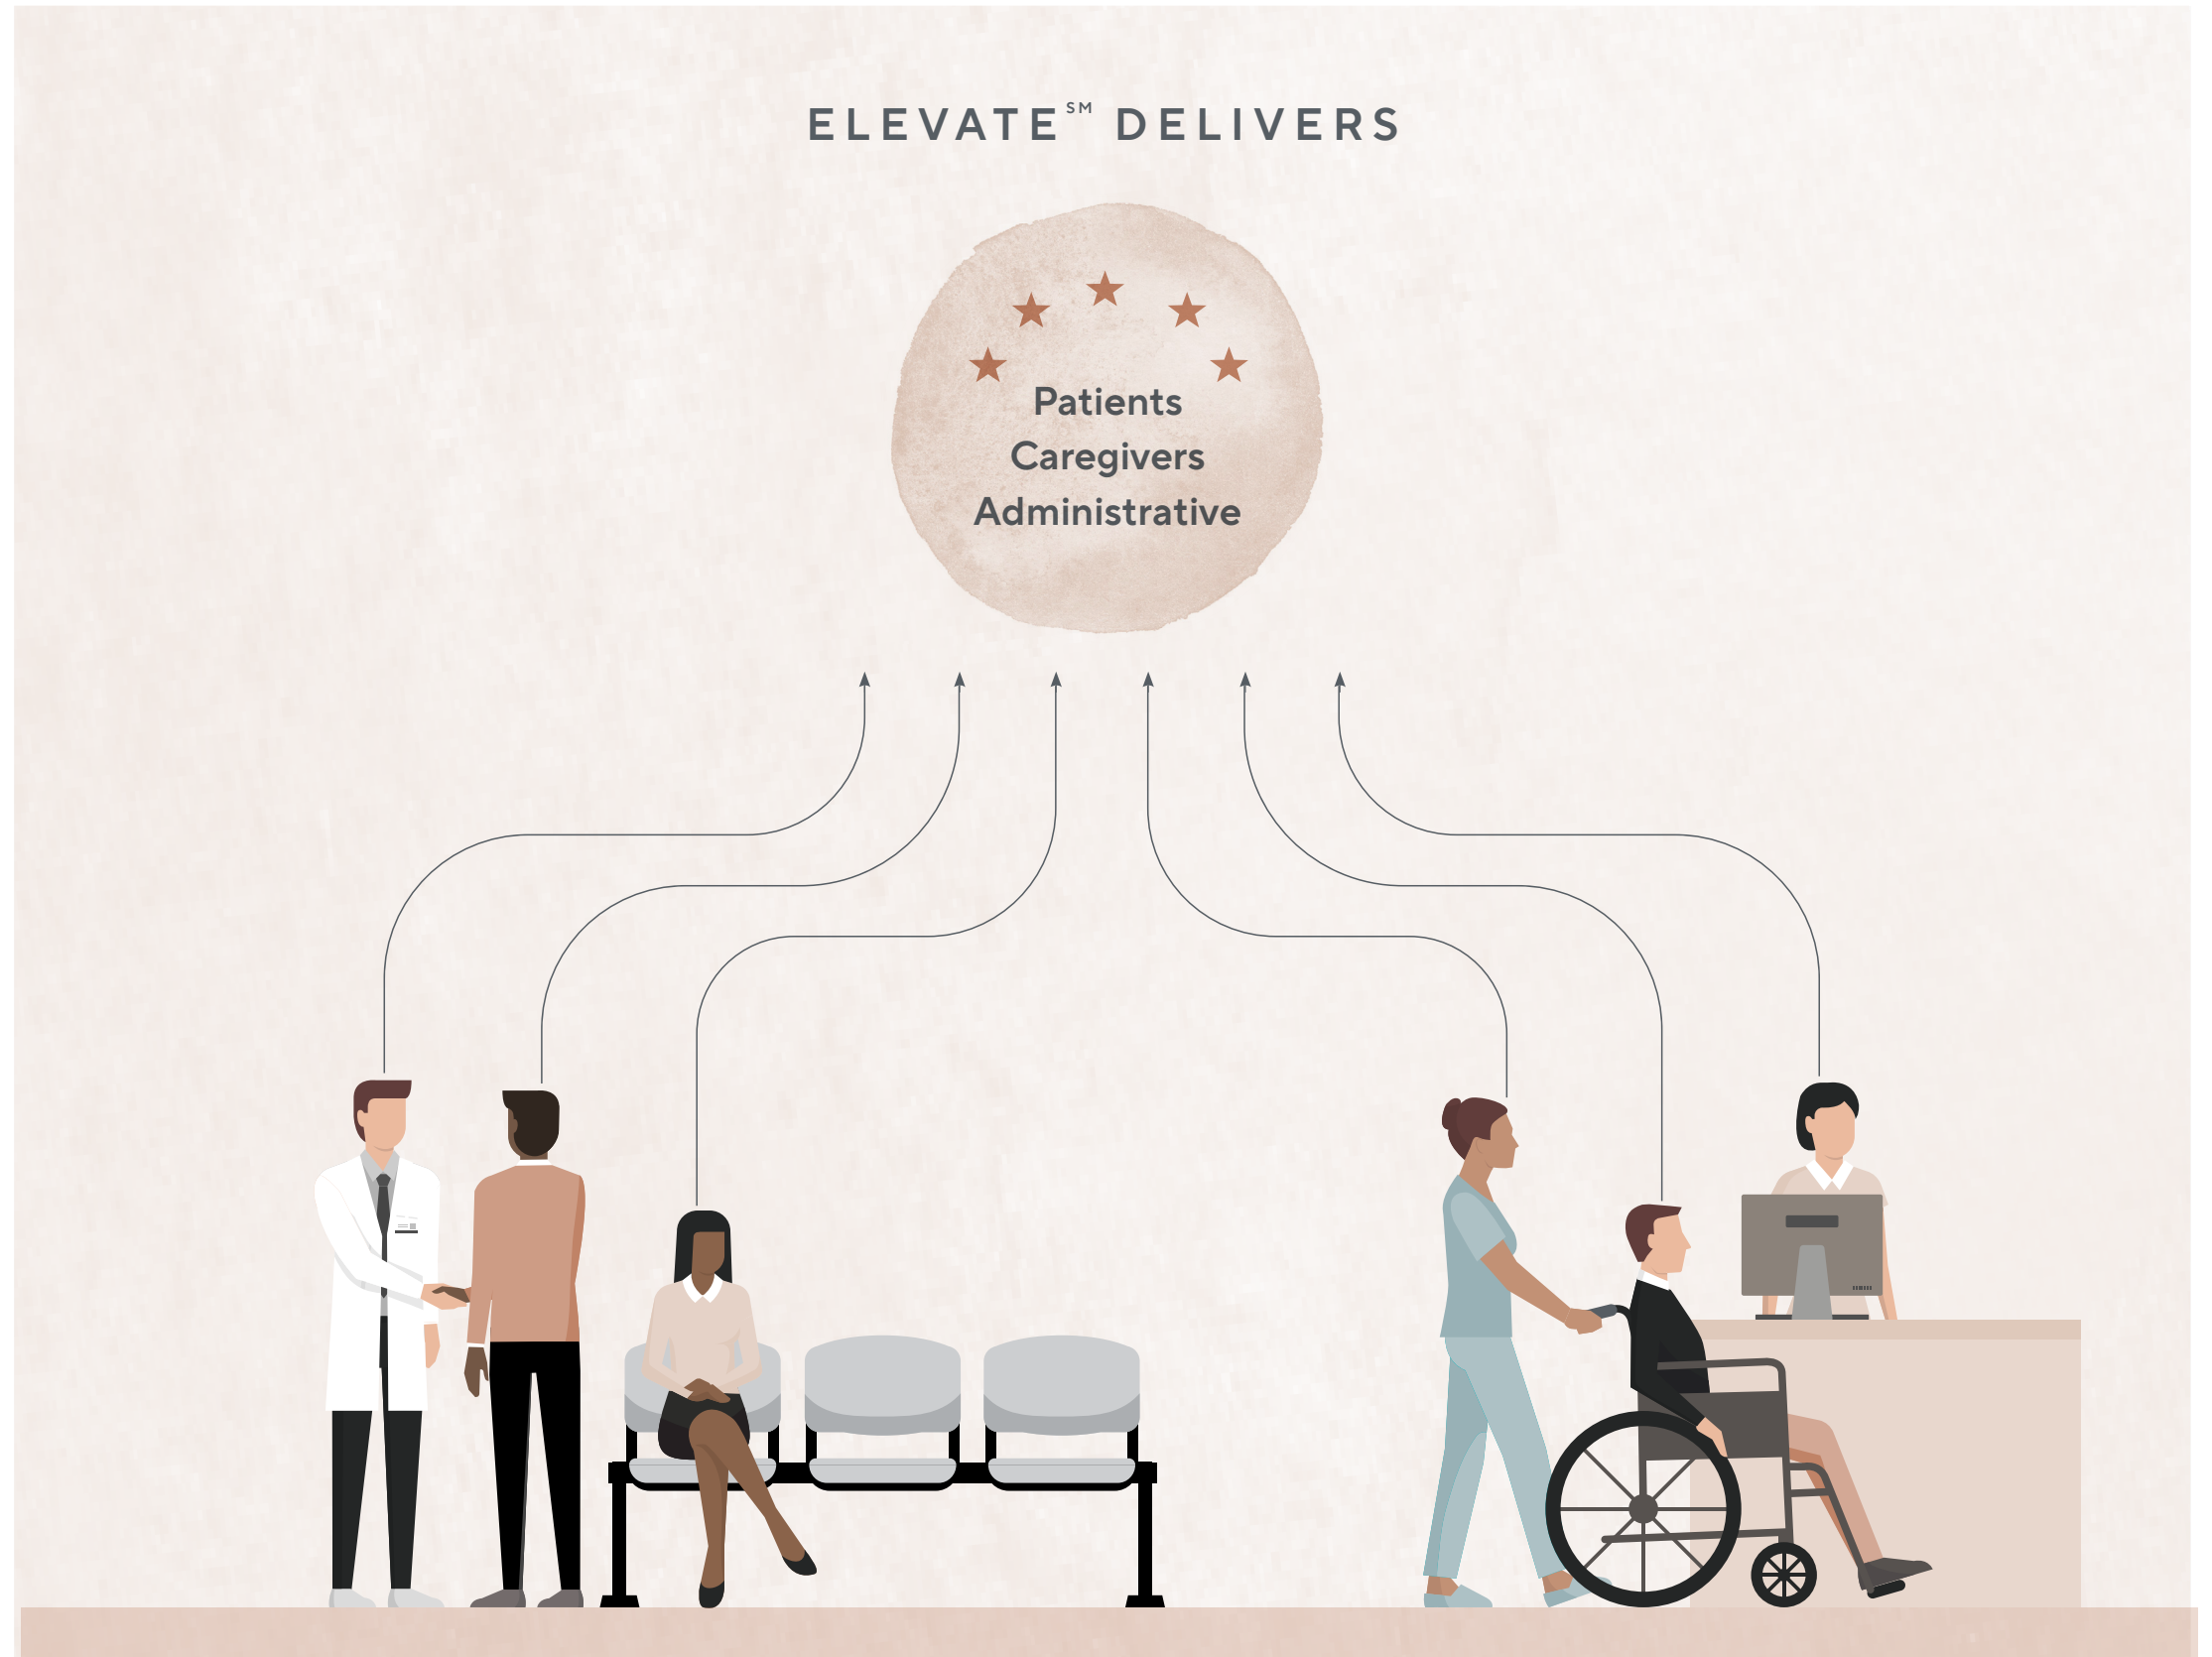

Kimball NATIONAL Etc. interwoven DAVID EDWARD

WHY KIMBALL INTERNATIONAL

Design Thinking for the Future of Healthcare

As healthcare undergoes the most extreme transformational shift in over a century, the role of space has never been as pivotal as it is today. By applying an evidence-based approach to space planning and product design, Kimball International anticipates trends to stay ahead of change. Our holistic collection of products keeps pace with the demands of today, so you can elevate every experience to impact the way healthcare is delivered tomorrow.

ELEVATESM DELIVERS

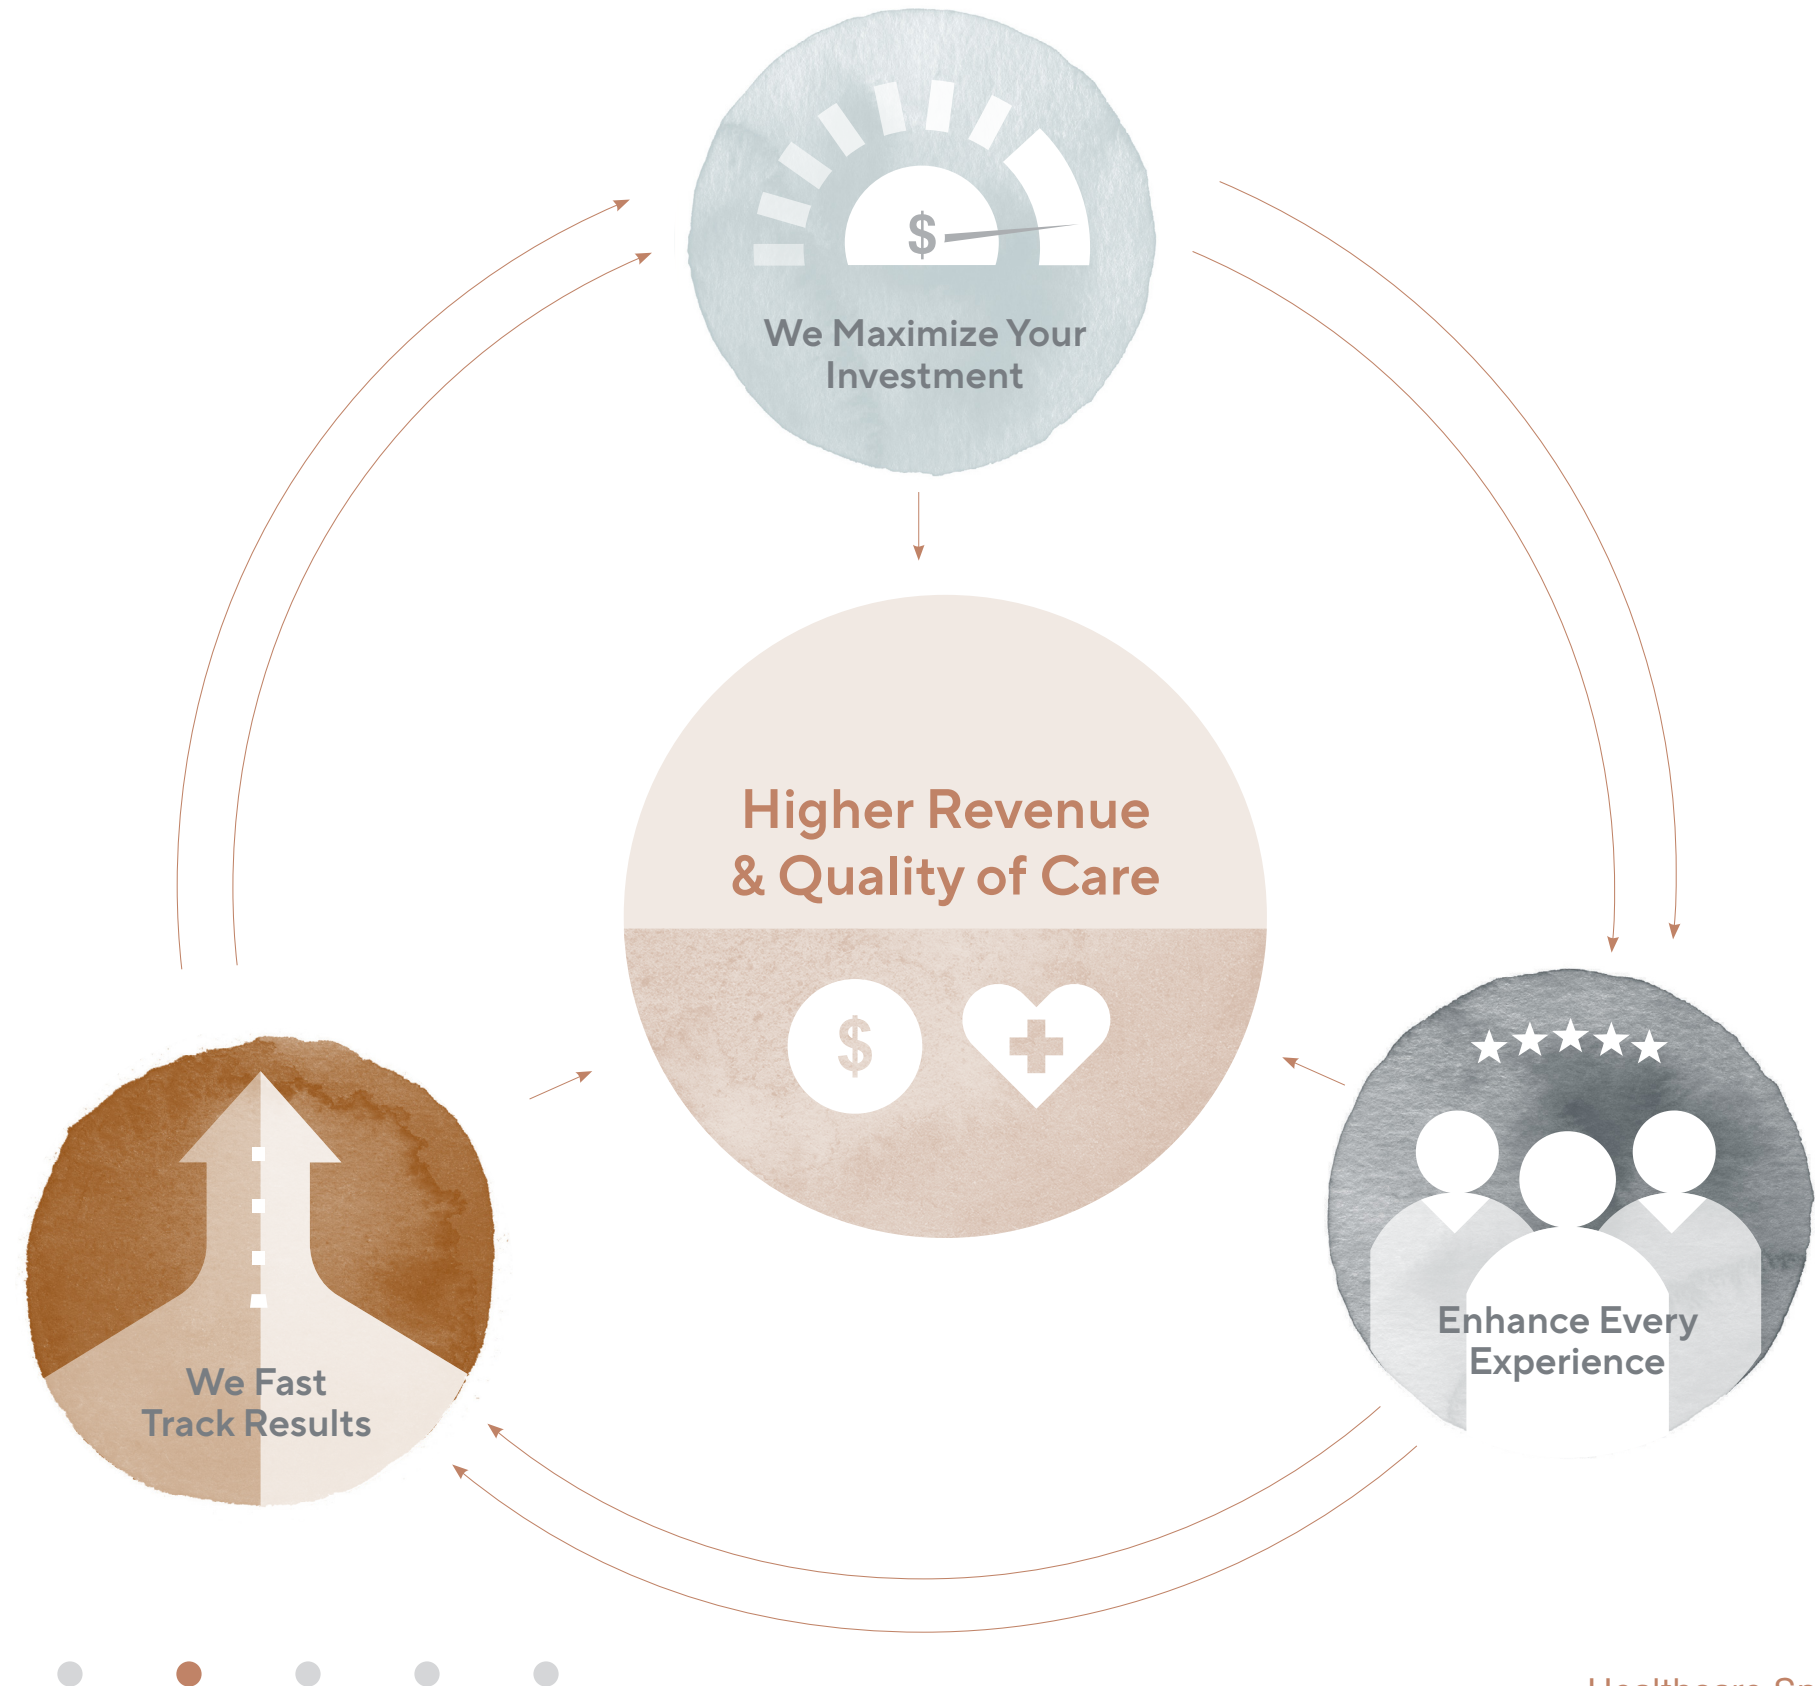

MAXIMIZING EFFICIENCIES

WHY KIMBALL INTERNATIONAL

Empowering Spaces for Healing

Our ELEVATESM design process and holistic product offering work together to improve efficiencies, streamline purchasing, and reduce time to market so you can serve patients sooner and deliver a higher quality of care.

WHY KIMBALL INTERNATIONAL

We Fast Track Results

Our highly efficient, interactive design charrette, ELEVATE, gets your facility up and running faster, so you can generate revenue sooner. This program allows all stakeholders to explore new ideas while making well-informed decisions based upon your schedule and budget realities.

WHY KIMBALL INTERNATIONAL

We Maximize Your Investment

Streamline a fragmented, complex purchasing process with a true single-source partner whose holistic offering includes custom capabilities that allow you to realize your brand vision and address more specific needs.

WHY KIMBALL INTERNATIONAL

Enhance Every Experience

Using evidence-based research, we design for process efficiency and incorporate amenities to improve overall conditions for staff. Our comprehensive approach emphasizes engaging, comfortable, and purposeful settings that support patients at every stage in their journey.

Patients that changed doctors last year because of long and uncomfortable wait times.

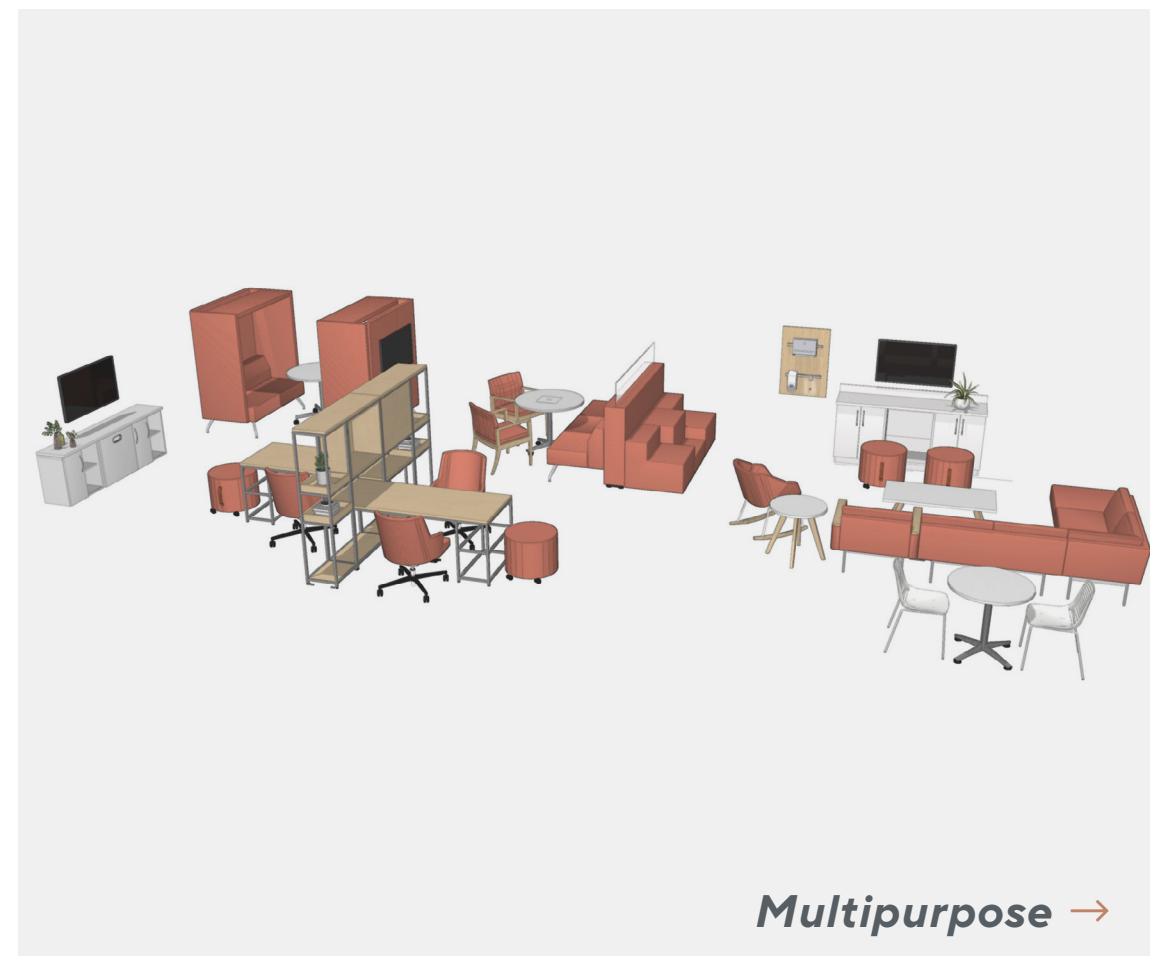

2018 Cardiovascular Business

COMMUNITY

Idea Starters

When designed around human needs, community spaces can help create better patient experiences by fostering more meaningful uses of time and increasing their confidence that they are receiving the best care throughout every step of their journey.

COMMUNITY

Active Space

These versatile settings provide many positive distractions while encouraging movement, a proven way to minimize stress.

- Seated and standing-height tables support freedom of choice for patients and guests looking for isolation or to engage with family.
- Seating is designed for utility and comfort, with conveniently located outlets to power devices.
- Lockers are available to store and secure personal items.

HEALTHCARE SETTINGS

Caregiver Stations

New technologies, methods of record-keeping, and administrative tasks have made the clinician's role more demanding. Supporting these demands requires a fresh approach to space planning where both people and place are holistically considered to empower clinicians to perform all the roles they switch between during a shift.

Idea Starters →

CAREGIVER STATIONS

Idea Starters

Settings where teamwork thrives and new workstyles are supported lead to greater job satisfaction, reduced stress, and more responsive patient service.

CAREGIVER STATIONS

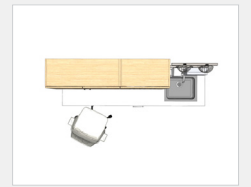

Decentralized Stations

Between 30-60% of caregiver costs are related to inefficiencies. For organizations looking to improve process, integrated touchdown stations can be a strategic asset for effective organization and record keeping.

- A workstation just outside the patient room is a place for charting and other clinician tasks, providing sightlines to the patient without needing to be in the room.
- Leverage walls to carve out quiet, comfortable areas where clinicians sit and can catch up on administrative tasks between patient visits.
- Ergonomic seating with intuitive controls support various people, postures, and tasks.

HEALTHCARE SETTINGS

Exam Rooms

No longer just a place for medical examinations and treatments, the exam room serves as a space where consulting, learning, and person-to-person sharing happens

Idea Starters →

70%

Patient encounters that do not require an exam table.

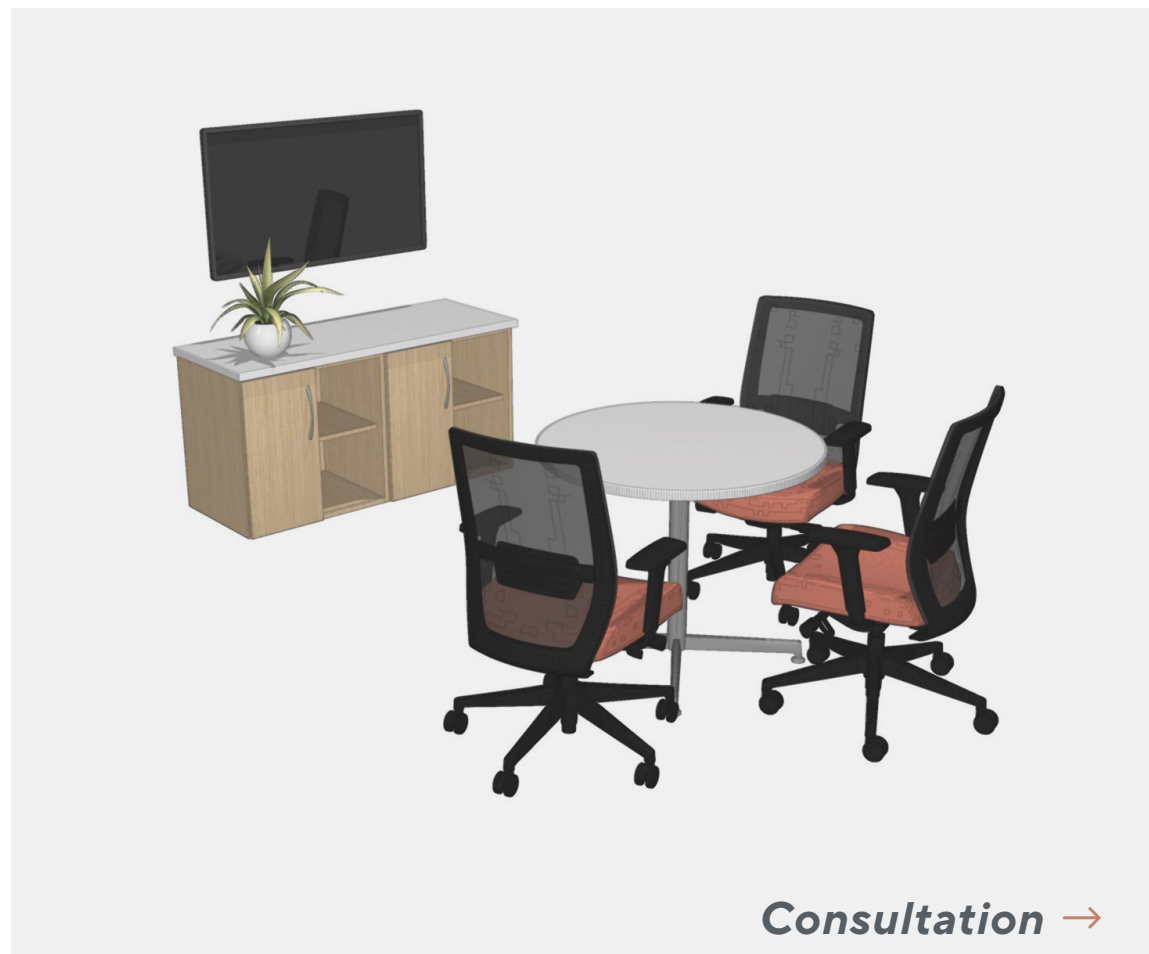

American Medical Association 2016

EXAM ROOMS

Idea Starters

Exam rooms are spaces where trust is established and relationships are built. To successfully manage a patient's health, both parties must be fully engaged.

EXAM ROOMS

Consultation

The clinical experience of a physical exam is shifting toward the human experience of a consultation where relationship building and information sharing are essential to positive outcomes.

- Promote eye contact and engaging conversation.
- Encourage communication with off-site caregivers.
- Support information sharing through technology.

FEATURED PRODUCTS:

HEALTHCARE SETTINGS

Treatment Areas

Giving holistic consideration to people and place results in settings that enhance patient healing and balance the needs of patients, families, and caregivers.

Idea Starters →

Infusion and dialysis can take minutes to hours. Patients prefer settings that align with treatment duration.

TREATMENT AREAS

Idea Starters

A fresh approach to space and design can enhance the clinicians' productivity while increasing the patients' emotional well-being by supporting their destination of choice.

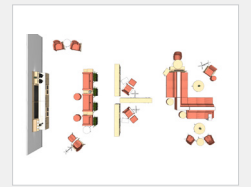

TREATMENT AREAS

Community Engagement

It's not uncommon for people to form relationships during treatment. Community settings allow patients to share experiences and build support groups throughout their treatment journey.

- A versatile layout supports a patient's freedom of choice to find the setting in which they feel most comfortable.
- Integrated technology can be used for teaching moments or entertainment to provide positive distractions for patients and family.

HEALTHCARE SETTINGS

Patient Rooms

Haven for patients. Hub for families. Workplace for caregivers. Patient rooms serve multiple functions throughout the day. When planned effectively, these spaces can aid a patient's recovery, welcome family as active participants, and provide caregivers the access needed to deliver the best care.

Idea Starters →

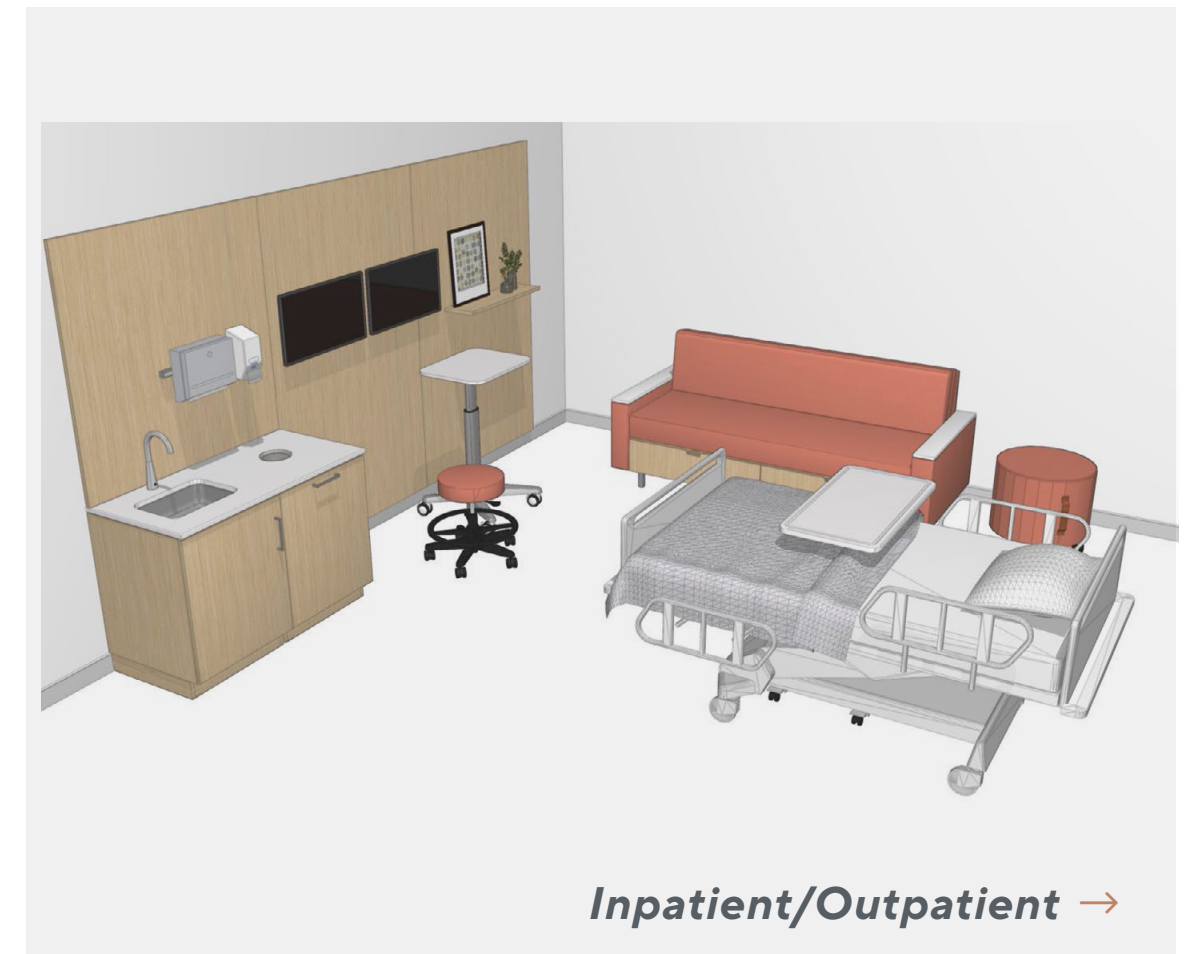

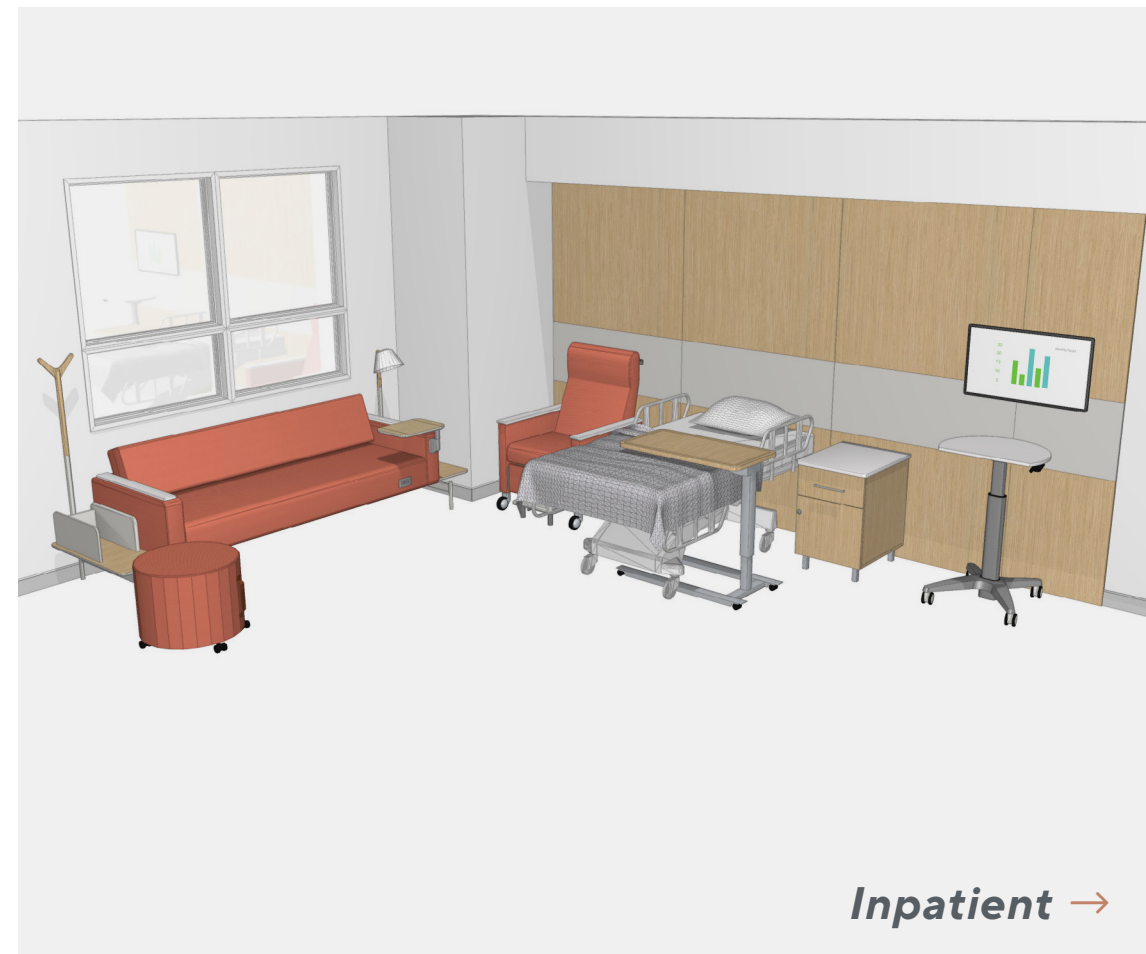

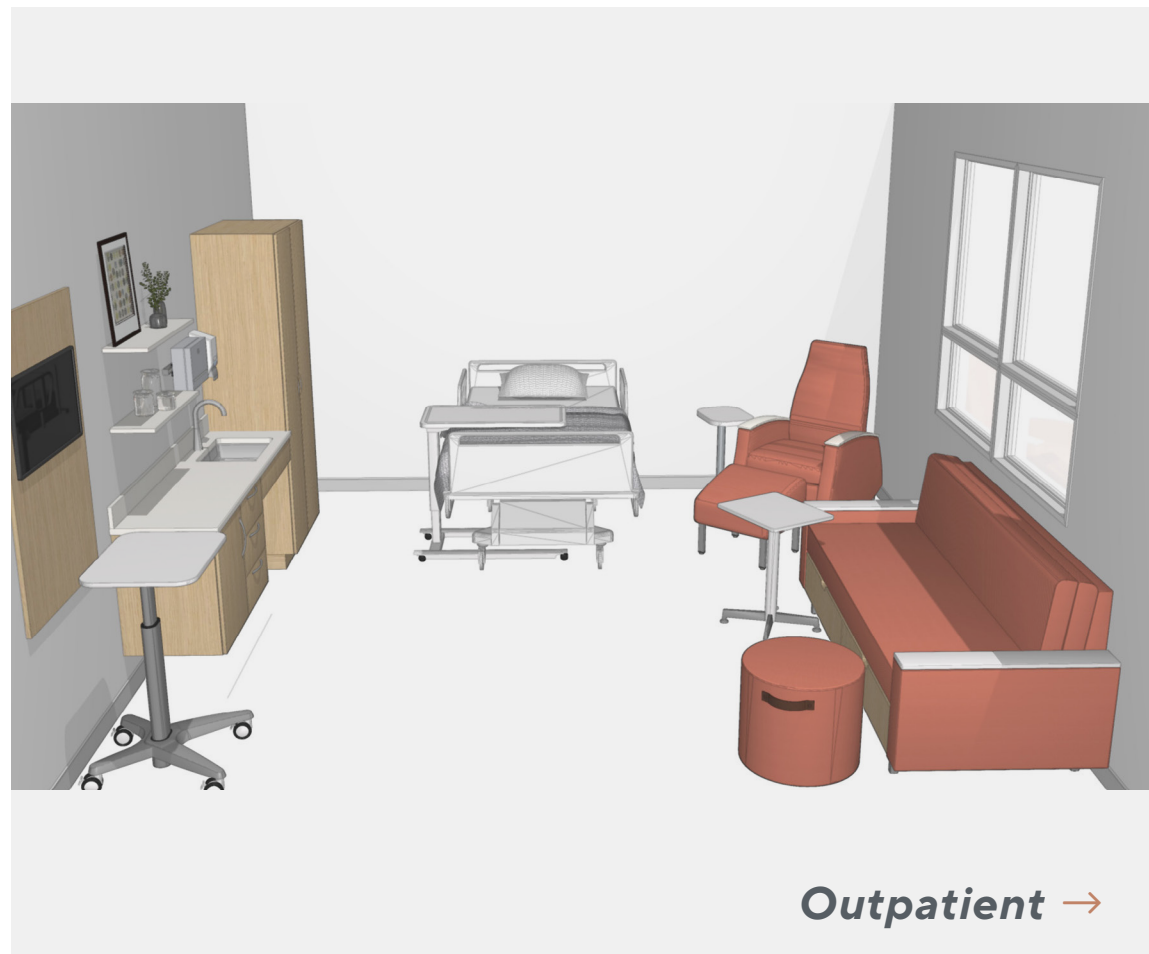

The average patient room size is 300 square feet.

PATIENT ROOMS

Idea Starters

When the elements of people and place are holistically considered, the results are patient rooms that empower healing and support the well-being of everyone who uses the space.

PATIENT ROOMS

Outpatient

Bedside learning is an essential part of patient-centered care. When technology is applied correctly, it can enhance interaction and learning by making valuable information accessible to everyone involved in the patient's care.

- Walls that support monitors allow clinicians to display health information and engage all participants.
- Balancing the comfort and connectivity of guests encourages participation during extended stays.
- Mobile stools and tables add flexibility to create zones that engage patients, family members, and guests.

WORKPLACE ENVIRONMENTS

Private Office

With the movement toward better space utilization, the traditional physician's office has evolved from a private, closed-door space to a more open and flexible area that focuses on patient consultation.

- Height-adjustable worksurfaces promote movement throughout the day for a healthy, active workstyle.
- Comfortable guest seating supports engagement and consultation with patients.

WORKPLACE ENVIRONMENTS

Collaboration

Small group. Department team. Board meeting. Information sharing can occur in many different settings. The key to success is standardizing on a collection of products designed to perform and integrate seamlessly into high-traffic, high-tech, and highly creative collaborative spaces.

- Armless task seating maximizes table space.
- Lounge seating with integrated technology and mobile tables supports overflow participants.
- Modular storage maximizes space and enhances collaborative settings by turning walls into usable, productive space.

WORKPLACE ENVIRONMENTS

Training

As healthcare provider shortages loom, training and development programs become increasingly important. Such programs can help retain current employees, improve their skills, and positively impact the overall quality of a health system.

- With modular and mobile tables, a training room can be set up or rearranged in minutes.
- Guest chairs that nest and stack for high-density storage support reconfiguration so training rooms can be used for other purposes throughout the day.

HEALTHCARE SETTINGS

Café

As healthcare organizations seek more efficient uses of facility space, dining areas are becoming the new commons. Purposefully designed dining areas can foster healthy behaviors in staff and improve the patient experience.

Idea Starters →

100%

More people go to the café than any other space, making it the new communal hub of healthcare.

Ardis C. Hutchins, Interior Architect, UW Health

CAFÉ

Idea Starters

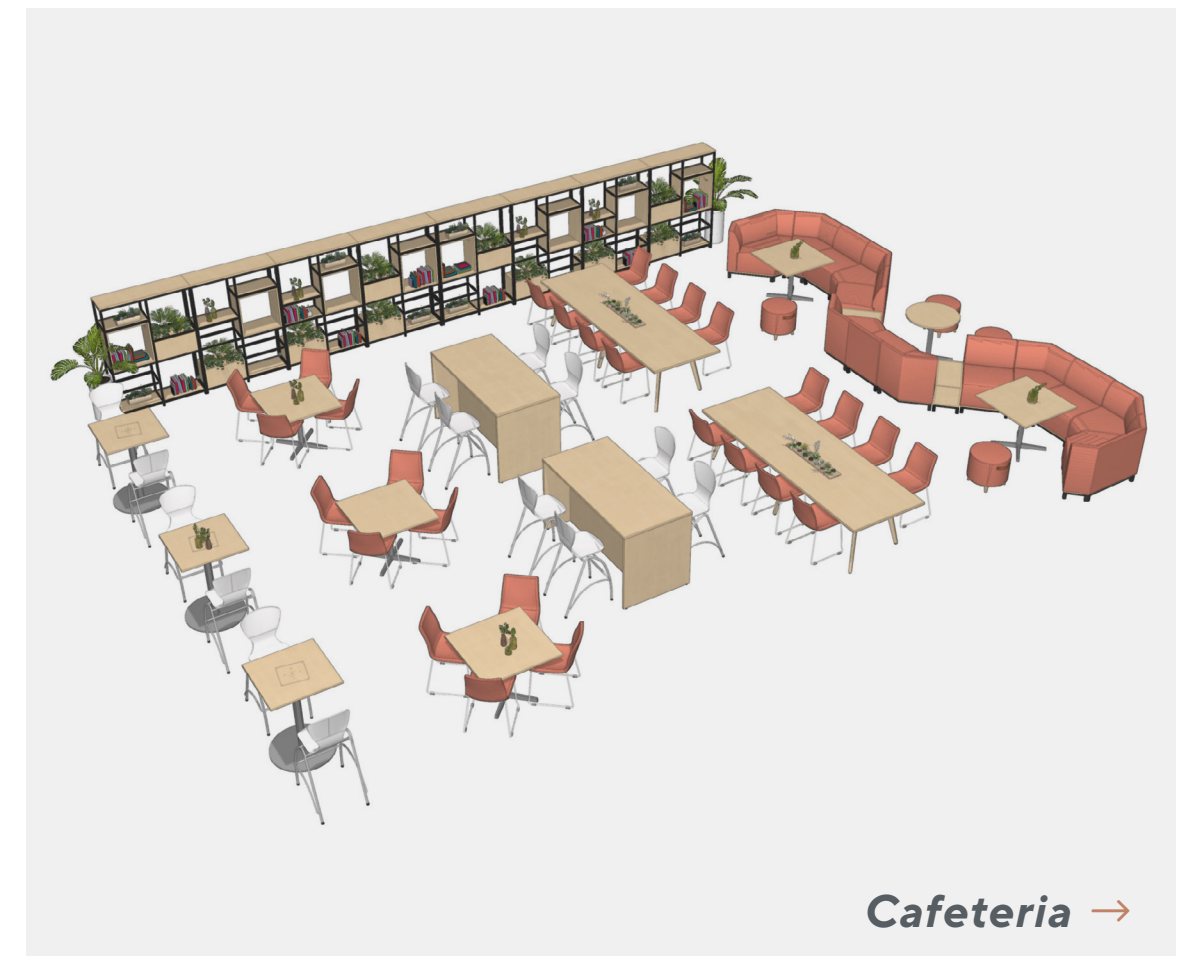

Café and dining spaces are often times the most utilized spaces in healthcare facilities and play a vital role in the overall patient and caregiver experience.

Café Lounge →

Cafeteria →

CAFÉ

Café Lounge

Well-designed café settings encourage staff interaction and provide guests with a place to break away during extended visits.

- Seated and standing-height tables support freedom of choice for patients or guests looking for isolation or to engage with family.
- Lounge seating is designed for utility and comfort, with conveniently located outlets to power devices.
- Casework construction makes it easy to future-proof the space and avoid built-in obsolescence.

CAFÉ

Cafeteria

When applying evidence-based design principles to cafeteria layouts, the results range from improved staff recruitment, retention, and well-being to better patient experiences.

- Infusing a variety of seated and standing-height layouts throughout the cafeteria creates a destination where guests and staff can eat, meet, work, or socialize.

HEALTHCARE SETTINGS

Breakroom

One of the ways that stress and fatigue can be addressed in healthcare is through the use of planned breaks for rest and rejuvenation, so staff members are ready and able to resume work.

Idea Starters →

49%

An overwhelming percent of registered nurses under the age of 30 experience burnout due to lack of breaks and personal time.

BREAKROOM

Idea Starters

Professional caregivers desire a place for respite away from patients to relax during breaks and refuel during long shifts.

BREAKROOM

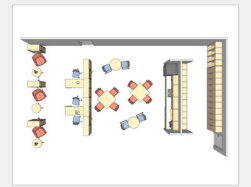

Refuel

Staff recruitment, retention, and healthy behaviors are just a few of the benefits well-planned breakrooms bring to the table.

- Tucked away, this workstation and lounge setting offers a dedicated zone for clinicians to refocus during a hectic shift.
- Social breakroom settings for relaxed conversations are supported by an efficient kitchenette.
- Dedicated locker area combines open storage for quick-grab items with closed storage to secure personal items during a shift.
