MEADOW™

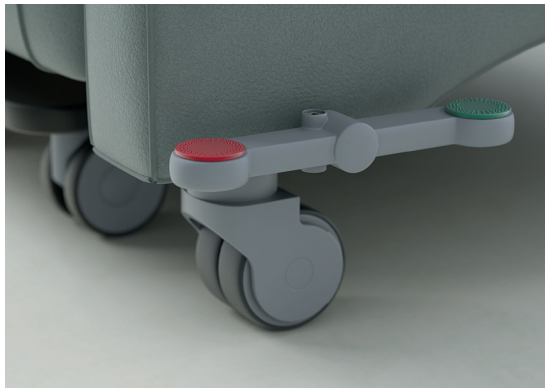

Back Bump Guard, Push Bar

Drop Arm

Pull-Out Footrest

Dual Wheel Central Locking Casters

CREATING SAFE ENVIRONMENTS

Meadow is a comprehensive, full function patient recliner designed to fit all patient body types and sizes. Equipped with features to accommodate a wide variety of services while supporting spatial efficiency with its small footprint and portability for patient transition, Meadow offers comfort and smooth motion.

PRECISION AND FLEXIBILITY

Meadow offers precise movement that feels personal to every individual. From smooth glide capabilities to a reclining sleeping position, the Meadow glider recliner can be adjusted to the ideal position for comfort.

Optional Wood Arm Cap

Glider Lock Lever

Infinite Back Position Lock

Meadow's infinite back positioning allows the patient to recline in 1° increments, from seated to a full sleeping position.

DESIGNED FOR ALL

The Meadow patient recliner is designed to benefit the patient and caregiver. The infinite back positioning and arm caps are built to accommodate the patient, while options like the drop arm and central locking casters support the needs of the caregiver.

Made for patients and caregivers alike, Meadow recliners add a new level of comfort and functionality to healing environments. The collection supports a broad range of applications and optional add-ons enhance its use.

Patient and Bariatric Recliner

- Independent footrest and back operation
- Footrest lever activation opening covered with black, 100% polyurethane Dolce fabric for easy cleaning
- Infinite back lock in 1° increments to full sleeping position
- Supportive, contoured back
- Removable upholstery cover on footrest
- Single wheel, grey, non-marking, individual locking casters for hard and soft surfaces
 - Arm caps available in finished beech wood, 3D laminate, polyurethane, and solid surface
 - Solid surface option includes EOS^{cu} (Cupron Enhanced EOS) Preventive|Biocidal Surfaces™, a copper-oxide infused, solid surface material that kills over 99.9% of harmful bacteria within two hours of exposure
- Drop arm models available only with arm caps in finished beech wood, 3D laminate, or solid surface
- Optional Trendelenburg (not available on bariatric models)
- Optional heated seat
- Optional moisture barrier on seat
- Optional push bar
- Optional utility hook (not available with drop arm)
- Optional bump guard (plastic, protective welt cord)
- Optional fold-down tray
- Optional pull-out footrest
- Optional central locking casters available

Glider Recliner

- Independent footrest and back operation
- Infinite back lock in 1° increments up to 160° recline
- Infinite back lock is positioned on the inside of the arm for easy access while holding a baby
- Supportive, contoured back
- Removable upholstery cover on footrest
- Black painted legs
- Gliding motion locks independently
- The glider recliner frame sits approximately 3" off of the floor for ease of cleaning
- Arm caps available in finished beech wood, 3D laminate, polyurethane, and solid surface
 - Solid surface option includes EOS^{cu} (Cupron Enhanced EOS) Preventive|Biocidal Surfaces™, a copper-oxide infused, solid surface material that kills over 99.9% of harmful bacteria within two hours of exposure
- Optional moisture barrier on seat
- Optional bump guard (plastic, protective welt cord)
- Due to the weight of the unit, we do not recommend scooting it across the floor as it may deface the floor surface and damage the glides
