SEATING COLLECTION

NATIONAL

Genuine style, inviting comfort.

This collection offers lounge, guest, and executive task solutions, in addition to a coordinating ottoman, creating a complete family of options. The curved seat of Mabel encases guests in comfort, commanding attention and delivering distinction. The low, mid, and high back lounge options provide a spectrum of modern design opportunities. Detailed stitching accents and the low profile sit experience add to Mabel's elegance.

A fusion of drama and function.

Mabel's executive conference seating solution offers mobility and comfort for collaborative spaces or an individual office. Its especially thin back profile and sweeping, curved seat combine to create a distinguished and alluring presence. The flex back provides support and slight reclinability while adapting to the motion of the user. Lock the tilt mechanism into any position and adjust the seat height for maximum ergonomic support. Mabel is a symphony of comfort and style.

The Mabel lounge collection offers distinct base styles, making it an unequivocal trendsetter. The polished low and high profile bases deliver cool style with two very distinct looks. With a nod to classic details, the 4-leg wood base unifies traditional and ultra-modern, while the wood high profile base gives Mabel an elegant pedestal to rest on. This variety allows Mabel to be transformed into a showstopper for any space.
