

The Journey of Picado™

WE LISTENED

We heard the need for a seating solution that can accommodate a wide variety of users, in multipurpose settings, that is easy to move and readily accessible for collaborative environments.

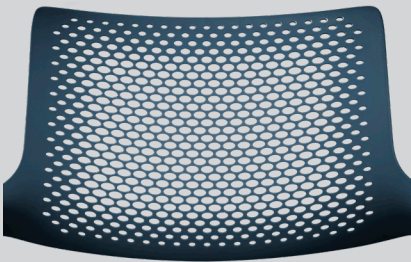

WE CREATED

We discovered a solution that promotes movement, fosters collaboration, is comfortable for long or short periods of time, and offers a monochromatic color palette. Picado is simply a solution for all space types. Picado stands out from the competition in the following ways:

Alluring Colorways

Create a compelling visual through Picado's monochromatic style (back, arms, frame, seat, and caster accent all coordinate) or bring in bold flair by adding an optional seat in contrasting upholstery.

Flex Back Design

Support changing postures and provide maximum comfort with the flex back feature. The perforated back design also provides an opportunity for air circulation.

Fast Delivery

Accommodate tight timelines by utilizing Picado's expansive Quick Delivery options and have seating delivered in 10 days or less. If an even quicker turnaround is needed, the black and grey models are ready within 48 hours.

Easy Adjustments

Maximize comfort by utilizing height adjustments that are automatic and intuitive.

WE DELIVERED

A collection of multipurpose chairs, specifically designed for collaborative spaces that require fast delivery, featuring automatic and intuitive adjustments, a flex back support for changing postures, and monochromatic color schemes.

Breadth of Line

Outfit entire spaces with consistent style by incorporating worksurface and stool height solutions.
