# Chesapeake Urology is the largest urology practice in Maryland and the Mid-Atlantic region with 24 medical offices and 18 AAAHC-certified ambulatory surgery centers.

Known for high-quality care, Chesapeake Urology, a United Urology Group affiliate, has been named as one of the top places to work in healthcare nationally by Modern Healthcare magazine and Becker's ASC Review. Reducing stress, accelerating healing, and promoting a sense of wellness are affordable and wise design investments for healthcare owners and operators. Sight lines and space design support Chesapeake Urology's high-quality delivery of care. At the clinic and ambulatory surgery center in Salisbury, the serene, easy to maintain settings welcome patients, families, and caregivers with schemes reflecting the seaside town and clientele.

"Consideration of sight lines for health providers, patients, and families shapes the space design," emphasized Susan Sakiyabu, Project Architect at Gensler. "We carefully consider the care journey from multiple perspectives to create purposeful, personalized settings that harmonize with healthy outcomes."

"As I design the interior architecture of important spaces like this, I engage partners like MOI (Dealer partner) and Kimball International who also offer health focused expertise," said Susan. "This collaborative design thinking ensures the client's design goals work hand in hand with the operational and financial goals."
