

Healthier Products Summary

Interwoven products can help you meet your Healthier Products sustainability goals by offering products that meet your requirements for the elimination of formaldehyde, per- and poly-fluorinated compounds (PFAS, polyvinyl chloride (PVC), antimicrobials, and all flame retardants from furnishing and furniture purchases. The restricted materials listed can contribute to the WELL X05 points.

Interwoven strives to offer a wide variety of furniture in a broad array of finishes and textiles and as such it is not possible to provide laboratory test results for every possible configuration. We have worked with our suppliers to ensure that the chemicals and treatments listed are not included in products above the guideline threshold limits unless specified by customers through specific options. Customers are responsible for the chemical content of COM textiles.

-
1. Customers are responsible for the specifying or supplying COM fabrics free from stain repellent, water repellent, PVC or flame retardant treatments.
 2. Products made up of less than 1% (one percent) of PVC by weight are exempt. Certain customer selected options could result in the inclusion of PVC components such as edge banding that weighs less than 1% by weight of the total product.
 3. New Furniture and furnishings must be tested in accordance with the ANSI/BIFMA Standard Method M7.1 and X7.1.

Products meet the previously published Healthier Hospital Initiative criteria V2.3
