

Priority™

Kimball®

Designed by Jay Henriott

Kimball International Industrial Designer

With a coordinated portfolio of desks, tables, storage units, and wall panels, Priority makes it easy to design a cohesive space that balances beauty and function. Each element integrates to create modern environments for individual or group activities.

Priority includes height adjustable solutions and a multitude of low storage pedestals that can be integrated for a truly comprehensive solution. Utilize tall vertical storage as a convenient way to organize workstations and establish space division. Wall-mounted overhead cabinets with writable glass fronts provide storage and functionality while tackable wall tiles and the accessory rail offer spaces to store files and keep personal items off the workspace. Create private offices, shared workspaces, benching configurations, and more with the infinite versatility of Priority.
