Dye Transfer/ Reverse Crocking	Some upholsteries may experience dye transfer (clothing dyes transfer to the seating fabric). This does not mean that the fabric of application is deficient, but rather it is an inherent characteristic of that fabric or application and is considered normal behavior. Once the dye transfer occurs and using routine cleaning, it can normally be removed due to Sedona's ink removal properties.

Please reference price list for product applications. Product details and other data are subject to change without notice. We will always ship a satisfactory commercial color match. Due to industry standard dye lot variation, colors may not match exactly. Cut yardage and individual memo samples are available. Contact Customer Service for pricing and availability.
