

Jelsen®

Kimball®

## Designed by John Nelson Sr.

Jelsen tables and stools feature a distinct hourglass shape, providing a timeless design for any space. The tubular base features a dramatic bend that establishes its striking silhouette, then flows into a circular pedestal creating a juxtaposition between angular style and organic beauty.

When you blend the varied sizes of tables and stools from the collection, the outcome is elegant simplicity. Stand-up height tables and stools provide a casual space to perch and visit. Add an end table to any welcoming area and it will become the focus of everyone's attention. Whether you pull up a stool for a quick conversation or gather around an occasional table, this cohesive portfolio meets all of your needs.
